STATEMENT OF THE CASE

Applicant in the above-styled cause seeks an order (1) creating an 160-acre, more or less, spacing and proration unit comprised of W/2SE/4 of Section 18 and W/2NE/4 of Section 19, Township 24 South, Range 35 East, N.M.P.M., Lea County, New Mexico; and (2) pooling all uncommitted interests in the Bone Spring Formation, WC-025 G-09 S243532M; Wolfbone Pool [98098]. COG (OGRID No. 229137) is a working interest owner in the proposed spacing and proration unit and has the right to drill a well thereon. COG proposes to dedicate the above-referenced spacing and proration unit to the proposed **Snapback Fee 502H Well** which will be horizontally drilled from the surface location in NW/4SE/4 (Unit J) of Section 18 to a bottom hole location of SW/4NE/4 (Unit G) of Section 19. The completed interval for this Well will meet the 330-foot standard offset from the outer boundaries of the spacing unit as required by the Statewide Rules for horizontal wells in 19.15.16.15 NMAC. COG has sought in good faith and been unable to obtain voluntary agreement for the development of these lands from all of the working interest owners in the subject spacing unit. The pooling of interests will avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights. As a part of a larger simultaneous drilling and completion project, COG requests an extension of the 120-day time period to drill and complete a well provided by the standard pooling order. In order to permit COG to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this spacing unit should be pooled, and COG Operating LLC should be designated the operator of the proposed horizontal wells and spacing unit.
