Attention: Tommy W. Thompson

RE: Injection Pressure Increase  
Langlie-Mattix Penrose Sand Unit  
Lea County, New Mexico

Dear Mr. Thompson:

Reference is made to your request dated January 25, 1989, to increase the surface injection pressure on the Langlie-Mattix Penrose Sand Unit Well No. 36-7. This request is based on a step rate test conducted on the well on January 20, 1988. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on the well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well:

WELL AND LOCATION

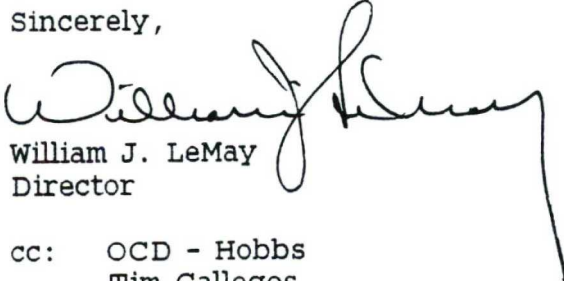

MAXIMUM INJECTION  
SURFACE PRESSURE

LMPSU Well No. 36-7  
Unit A, Section 34, T-22 South,  
R-37 East, NMPM, Lea County, New Mexico.

1612 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

  
William J. LeMay  
Director
