Re: 2006 Plan of Development
Bravo Dome Carbon Dioxide Gas Unit
Union, Harding and Quay Counties, New Mexico

Ladies and Gentlemen,

In accordance with Article 4 of the Bravo Dome Carbon Dioxide Gas Unit Agreement, OXY USA Inc, as Unit operator, herewith submits the 2006 Bravo Dome Unit Plan of Development. This plan is tentative pending approval by Unit Working Interest Owners.

Current CO2 production is approximately 300 mmscfd from 422 producing wells. Development projects in 2005 added 14 producing wells to the Unit. Attachment I is a listing of the wells drilled in 2005. Ten wells were plugged during 2005 as noted on Attachment II. Current cumulative Unit sales are approximately 2.55 TCF.

The 2006 Plan of Development for the Bravo Dome Unit is two fold. Oxy expects to begin detailed engineering and procurement activities on a proposed \$30 million booster compression project to be located at the existing compressor station. These boosters will likely be commissioned and running by mid 2007. Preliminary estimates indicate that these boosters could increase Unit deliverability by 70-90 mmscfd to around 380 mmscfd, which is near existing Unit facility capacity. Secondly, Oxy plans to increase production by an estimated 14 mmscfd through a 15 well extension and infill drilling program to be completed during the summer months of 2006. Four of these wells are extension wells and eleven are infill wells. Drilling is scheduled to begin in June and all wells should be completed by September, 2006. Attachment III is a tentative listing of these proposed 2006 wells (pending staking and permitting).

The longer range plans (2007 – 2010) continue this strategy to add well capacity to the existing compression / dehydration facility. These plans include drilling approximately 20-30 wells per year to offset unit decline. A mixture of both infill and expansion wells are included in the plans, however there will be more of an emphasis on extension wells in the future. Unit production is expected to peak in 2008 and decline at 8.5% without additional drilling. We are currently planning additional drilling projects each year to offset this Unit decline and maintain production in the 360-380 mmscfd range.

Current Oxy manpower operating the Bravo Dome Unit is 12 employees, up one employee from 2005. Currently, there are 4 full time contractors working at the Unit. All of these employees and contractors are New Mexico residents.

2005 UNIT ACCOMPLISHMENTS

- 1) Spent \$5.2MM to drill 14 infill and extension wells resulting in additional production of 15 mmscfd
- 2) Continued evaluation of booster compression at the existing compressor station
- 3) Performed remedial acid jobs on 66 wells to increase production
- 4) Spent \$0.53MM to rewind two large horsepower electric motor stators
- 5) Maximized compressor reliability/runtime

February 15, 2006

Page 2

2006 UNIT PRIORITIES

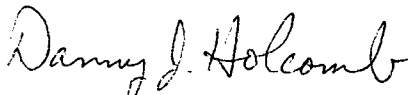

- 1) Drill 15 new wells and lay new gathering lines at a cost of \$6.62MM to add approximately 14 mmscf in production
- 2) Begin detailed engineering and procurement activities on a 24,000hp booster compression project.
- 3) Spend approximately \$150,000 on preventative compressor maintenance in order to maintain compressor reliability and runtime
- 4) Spend approximately \$450,000 to purchase a new, spare 8000hp electric motor stator to improve reliability and runtime
- 5) Maximize compressor reliability/runtime

FIVE YEAR PRIORITIES

- 1) Install booster compression at the central compressor station to increase plant throughput by 70-90 mmscf
- 2) Drill extension wells and lay new gathering lines each year to offset unit decline and maintain production in the 360-380 mmscf range
- 3) Maintain effective cost control to sustain competitive position

The items detailed in this 2006 Plan of Development are subject to Unit working interest owner and NMOCD approvals, continued strong CO2 demand and favorable project economics. Oxy and the other working interest owners plan to continue to develop the Bravo Dome Unit to the best interest of all parties involved. The Plan of Development hereby submitted shall be revised if Unit development plans change. If you have any questions, please contact Danny Holcomb at 505-374-3010 or at the above letterhead address.

Sincerely,

Danny J. Holcomb
Bravo Dome Team Leader

Dear Mr. Holcomb:

The Commissioner of Public Lands has, of this date, approved the referenced Plan of Development. Our approval is subject to like approval by all other appropriate agencies. The possibility of drainage by wells outside the unit area, and the need for further development of the unit may exist; therefore, we may contact you at a later date regarding these possibilities.

If you have any questions or if we may be of further help, please contact Pete Martinez at (505) 827-5791.

Very truly yours,

PATRICK H. LYONS

Dear Ms. Woolridge:

We are in receipt of your letters of June 26, 2006 and August 28, 2006 together with your application and for approval of the first through twenty-second expansions to the Dakota participating area for the Northeast Blanco Unit:

The Bureau of Land Management approved the above referenced expansions by their letter of August 9, 2006.

The Commissioner of Public Lands concurs with the Bureau of Land Management and has this date approved the above-referenced Dakota participating area expansions. The revisions for the above mentioned participating areas submitted with your letter of August 28, 2006 have also been accepted.

Our approval is subject to like approval by the Bureau of Land Management and the New Mexico Oil Conservation Division.

If you have any questions or if we may be of further help, please contact Pete Martinez at (505) 827-5791.

Very truly yours,
