Govenor Richardson: Most of the state of NM would like for you to come back to NM and govern the state. If you let the new pit rules go into effect our state economy will nose dive. I realize you do not care since you plan to reside out of NM, but if you are realistic you know you will not be the Democratic nominee and therefore you will have to accept VP if offered, which you adamantly say you will not do or come back and face a state treasury in trouble. Please do not put families out of work, casue a crash in NM real estate, massive hardships on the industry in our state. There are other states these companies will do business in if this horrible horrible rule passes. You are looking for donations from enviromental groups and agencies for your presidential campagin, but will they help NM when you do not win the nomination?

Please re-consider this immediately if you truly are a New Mexican.
