Adm

Hello Mr. Pierce:

We must formally inform you that Momentum Operating Company, Inc. (Mike Parsons President) has protested your application on behalf of Targa to convert this SWD-561 well into an Acid Gas injection well and therefore the Division can no longer process this administratively. Apparently you were sent a copy of this protest letter.

The Division has in recent years been processing these type of applications through the hearing process, with evidence presented as required on Form C-108. The Division had not yet evaluated your C-108 in this case or decided if this administrative application should go to hearing - but your efforts were not wasted, because the same C-108 data would need to be submitted at hearing. If you do have minor issues with Momentum and work these out rapidly, let us know.

Targa's attorney must work with Division rules of procedure and with Ms. Florene Davidson of this office to set this to a hearing docket. At the hearing, please be prepared to address the issue of protection of offsetting wells that penetrate the injection interval from the Acid Gas injection, any possible safety issues, possible damage to the surrounding San Andres reservoir or residual oil in this reservoir, and evidence of notice to all affected parties including newspaper notice. Please also address how the well would be equipped and operated: whether it would inject CO<sub>2</sub>/H<sub>2</sub>S under pressure or whether water would be also injected with the gas. How the annulus would be protected and monitored - type of annular fluid, etc. What would be the expected maximum injection rates and pressures under various injected fluids.

Please ask Targa to work with Wayne Price's Environmental Bureau on any other anticipated surface safety or pollution issue or permit revision prior to the hearing.

**Subject:** Acid Gas AOR requirements

Hello Mike:

Just passing on that Richard instructed me today to require a 1 mile AOR on all notices and well construction for Acid Gas Well applications - includes only wells which penetrated at least the top of the intended injection interval. We are also expecting all Acid Gas applications to be processed after notice and hearing - but you can always submit the C-108 first to the Engineering Bureau for review by the engineer normally assigned to look at injection applications - that way your Examiner Hearing may happen without too many surprises for your client.

I must apologize for telling you previously on this particular permit application to only look at well construction up to 1/2 mile away. This revision may require lots more work getting this permit ready but the 1 mile requirement is consistent with the previous applications of this type evaluated by the Division. Please include all casing/cementing/plugging details sufficient for the Division to quickly see if AOR wells have cement covering the injection interval - including DV tools and cement above and below.

DAVID Brooks advises a 1 MILE  
AOR NOTICE TO ALL SURFACE  
OWNERS IN ADDITION TO THE  
701 B.(2) RULE (PARTIES).

Hello Scott Hall (representing Targa) and Phil Wahl - representing Momentum Operating????

(Mike Parsons or Scott Hall - please forward this to Momentum's attorney as I do not positively have his/her name or contact info.)  
....and anyone else who should be kept notified.

Attachment is correspondence concerning this matter - setting forth guidelines and asking Targa to initiate a hearing.
