Re: Request for Unorthodox Well Location:  
Gallegos Canyon Unit, San Juan County,  
New Mexico

Gentlemen:

Energy Reserves Group, Inc. respectfully requests approval of the below referenced well location.

Gallegos Canyon Unit Well No. 331  
1875' FNL 640' FWL  
Section 29, T29N-R12W  
San Juan County, New Mexico  
Fee Lease - L.V. Goff et ux

This proposed well is to be drilled to the Pictured Cliffs Formation at a depth of 1365'. Energy Reserves Group, Inc. is the sub operator of the Gallegos Canyon Unit which includes all formations above the base of the Pictured Cliffs Formation. Attached is a map delineating the Gallegos Canyon Unit boundry and the Pictured Cliffs participating area.

This location is situated along the San Juan River bottom approximately 250' North of the current flow channel. Amoco Production Company has constructed an access road and well pad into their well No. 173-E located approximately 100' West of our proposed site. The area was elevated by hauling approximately 3' to 4' of fill material to eliminate flooding during periods of high run off. It is proposed to extend their pad a sufficient distance to allow for rig placement and safety of operations.

In addition, there are private residences located to the Northeast of the well which would prevent moving the site to the orthodox location.

We would appreciate your review of our request based upon the topographic conflicts.

Very truly yours,

ENERGY RESERVES GROUP, INC.
