DOCKET: COMMISSION HEARING - WEDNESDAY - JUNE 8, 1983

1:30 P.M. - OIL CONSERVATION COMMISSION - MORGAN HALL,  
STATE LAND OFFICE BUILDING, SANTA FE, NEW MEXICO

CASE 7858: (Continued and Readvertised)

Application of El Paso Natural Gas Company for the reclassification of marginal gas wells in the prorated gas pools of Southeast New Mexico and the suspension of certain proration rules. Applicant, in the above-styled cause, proposes that there not be any marginal wells in the fifteen prorated gas pools in Lea, Eddy and Chaves Counties. Applicant seeks the reclassification of all marginal wells in said pools as non-marginal wells, effective June 1, 1983, said wells to become non-marginal with a zero net over/under produced status as of June 1, 1983. Applicant also proposes that all non-marginal wells at date of classification would continue to be classified as non-marginal at least until September, 1983, and would continue to accumulate their net over/under produced status. Further, applicant proposes that no well would be reclassified as marginal until after the September, 1983, production has been reported, when all provisions of Rule 16-A of the Special Rules for prorated gas pools in Southeast New Mexico as promulgated by Order No. R-1670, as amended, would be again applicable. Applicant further proposes that Rule 15B of the prorated gas pool rules which pertains to the shutting-in of wells which are six times over-produced would be suspended for the period from date of reclassification through December of 1983 to accommodate those wells which may be subject to shut-in as the result of assignment of lower than normal allowables during the first seven months of 1983. In the alternative to reclassification of all wells as non-marginal, applicant proposes that a level of production of 33 Mcf per day, or other appropriate level, be established below which wells would automatically retain their classification as marginal.

CASE 7905: Application of Doyle Hartman for classification as marginal of all wells in the prorated gas pools of Southeast New Mexico.  
Applicant, in the above-styled cause, seeks an order classifying all wells in the:

Atoka-Pennsylvanian Gas Pool

Buffalo Valley - Pennsylvanian Gas Pool  
Burton Flats - Morrow Gas Pool  
Burton Flats - Strawn Gas Pool

Eumont Gas Pool  
Indian Basin - Morrow Gas Pool  
Indian Basin - Upper Pennsylvanian Gas Pool  
Jalmat Gas Pool  
Justis Gas Pool

as marginal until further order of the Commission.
