Subject: Cases 14193, 14194, and 14195/Cimarex

David: I received the following info from my client on penetration points in the Wolfcamp:

Enterprise 11-2H (Case 14193):

We landed the curve 295' VS away from the pilot hole, therefore 330' (surface location fwl) + 295' (landed the curve) = **625' fwl**

Intrepid 9 Fed Com #1 (Case 14194):

This well is only proposed (hasn't been drilled yet), but 330' (surface location fwl) + 300' (expected VS to land the curve) = **630' fwl**

Ticonderoga 16 St Com #1 (Case 14195):

Same for this well - it is only proposed (hasn't been drilled yet), but 330' (surface location fwl) + 300' (expected VS to land the curve) = **630' fwl**

McCain or Obama? Stay up to date on the latest from the campaign trail with [AOL News](#).
