Subject: Case 14295

David

On March 31, 2009 NM OCD Aztec hosted a meeting with representatives from: Koch Exploration, ConocoPhillips Company, Burlington Resources, Energen Resources, West Largo Corporation and the BLM, Farmington Field Office petroleum management team. The applicants presented their proposal for a limited infill pilot test in the Basin Fruitland Coal Gas Pool.

The evidence they presented indicates that there is no interaction between parent and present infill wells and that EUR for the pool in this area may be increased by further infill.

We have no objection to this application.
