Subject: Keel West Waterflood Project Expansion by Merit Energy

Hello Kristin:

Justin called today and asked that I look over the three WFX permit applications you sent in to allow injection for waterflood purposes into the

JL Keel B #77

H.E. West B #35

J.L Keel B #57

Case No. 11580, R-10663 expressly denied injection into the #77 and the #35 wells (likely) based on the presence of a poorly plugged well (in Unit I of Section 8, T17S, R31E) called the Keel B #28. At that time (Sept 1996) that well did not have adequate cement plugs to isolate the high (2500 psi) pressures being used in this waterflood over this injection interval. The Keel B #28 is also open below the Grayburg San Andres.

Deviated drilling techniques are much more capable than in the past and may have made it possible at this time to drill over to that wellbore and enter it below the salt section and thereby re-enter and replug it so as to isolate injection to the Grayburg-San Andres.

Because two of these proposed injection wells were denied for injection after hearing evidence in an examiner hearing, a new hearing should be initiated with new evidence to overturn that ruling - talk to your attorney about this.

The #57 well was not mentioned in that hearing order but is in that vicinity of the Keel B #28. Unless the Keel B #28 has since been re-entered and re-plugged, then your administrative application to inject into the #57 well must also be denied.
