STATEMENT OF THE CASE

APPLICANT:

NEW MEXICO OIL CONSERVATION DIVISION

Applicant seeks amendment of 19.15.39 NMAC to add two new sections setting out special provisions for Santa Fe County and the Galisteo Basin, which extends into portions of San Miguel and Sandoval Counties. Proposed section 19.15.39.9 NMAC requires operators to obtain the approval of the Oil Conservation Division (Division) for an exploration and development plan prior to drilling, reentering or deepening a well in Santa Fe County or the Galisteo Basin, and requires the operator to renew the plan every five years. The operator will be required to operate the wells covered by the plan in accordance with the plan's requirements until the plan is specifically replaced by a special pool order. The proposed rule sets out the process for obtaining, amending, renewing and replacing exploration and development plans. Proposed section 19.15.39.10 NMAC sets out conditions that will be applied to applications for permits to drill, re-enter or deepen a well covered by an exploration and development plan. These conditions will apply unless the operator's approved exploration and development plan recognizes an exception.

OTHER PARTY

APPROACH RESOURCES INC. AND APPROACH OPERATING, LLC

Approach Operating LLC, ("Approach") owns permits to drill and has applied for additional permits for wells for the exploration and development of significant oil and gas leasehold interests in New Mexico owned by its affiliate company, Approach Oil and Gas, Inc. These APD's are the subject of Case Nos. 14134 and 14141 presently pending before the Commission.

It is Approach's view that fulfillment of governmental responsibilities to prevent waste, protect correlative rights, protect fresh water, human health and the environment is best achieved by the adoption and administration of an oil and gas regulatory scheme that is at once predictable, reliable and uniform. It is also Approach's view that the Division is best situated to discharge this regulatory function.
