DOCKET: EXAMINER HEARING - THURSDAY - SEPTEMBER 3, 2009

8:15 A.M. - 1220 South St. Francis Santa Fe. New Mexico

Docket Nos. 32-09 and 33-09 are tentatively set for September 17, 2009 and October 1, 2009. Applications for hearing must be filed at least 30 days in advance of hearing date. OCD Rule 1211.B requires parties who intend to present evidence at an adjudicatory hearing to file a pre-hearing statement no later than the Thursday before the hearing, and serve a copy on opposing counsel of record. If the OCD does not receive a pre-hearing statement from the applicant by the close of business on the Thursday before the hearing, the hearing may be continued or dismissed by order of the examiner. If a protesting party fails to submit a timely pre-hearing statement, the hearing may be continued at the applicant's request. The following cases will be heard by an Examiner.

1. [CASE 14356] (Amended and Readvertised): (Continued from the August 6, 2009 Examiner Hearing.)

Application of Energen Resources Corporation to Amend Order No. R-10448 to Authorize the Injection of Water for Pressure Maintenance Operations for the West Lovington-Strawn Unit, Lea County, New Mexico. Applicant seeks approval to convert the following well for the injection of water in connection with pressure maintenance operations in the West Lovington Strawn Unit:

West Lovington Strawn Unit Well No. 8-R

API No. 30-025-32291-01 1980' from the south line and 660' from the west line (Unit L) Section 34 T-15-S, R-35-E, NMPM

Applicant proposes to convert and utilize the well for injection of water through a closed system into the Strawn formation, West Lovington Strawn Pool, through perforations at depths of 11,520' to 11,592'. Injection operations will be conducted at an anticipated average daily injection pressure of 850 psi with a maximum surface injection pressure of 1,950 psi or as permitted by the Division. Applicant proposes injection of water at average daily rates of approximately 4,000 bbls and at maximum daily rates of approximately 5,000 bbls. The source of the injected fluids will be produced water from area Strawn formation wells. The well is located approximately 2 ½ miles Northwest of Lovington, New Mexico.
