The units are to be dedicated to the Mallon 35 Fed. Lea County, NM

Gentlemen:

Reference is made to your letters dated December 10, 2009 and received December 18th, 2009 by certified mail. Your proposal is problematic for several reasons.

It is not clear whether you are proposing under the existing Joint Operating Agreement (JOA) or under the unexecuted JOA that was included and referenced in your correspondence by even date. As the operator of the existing production in the lands and leases, it would seem that if Cimarex Energy Company (Cimarex) were interested in executing a new operating agreement or amending an existing JOA with the original partners in the existing wells within the leasehold estate, that business should precede proposal of the referenced wells. Since Cimarex has, by the referenced letters proposed these wells, the drilling of those wells will be governed by the existing JOA to the extent authorized. Execution of the attached JOA without clarification/ratification or abandonment of the existing JOA will certainly create a conflict between JOAs.

We object if Cimarex intends to drill the proposed four wells under an existing JOA as proposed. We do not believe that it is prudent to prosecute the drilling of four horizontal wells in a single section within the time constraints required under a single JOA with four proposals of even dates. None of these lands are in jeopardy of expiration nor are they being drained.

If there is no clear operating agreement embracing these lands, or any portion thereof, covering these proposals, or if a conflict exists between existing operating agreements, then these proposals being made are anticipating a forced pooling of the interests herein referenced. Those interests subject to the original JOA must have proper proposal/notification and the interests pooled must be so identified separately. We object to having our interest included in a forced pooling if it is subject to an existing JOA.

By this letter Fuel Products, Inc. and Pear Resources (FPI & PR) hereby request that Cimarex withdraw all of its proposals to FPI & PR until such clarification can be provided to FPI & PR in said lands. This will insure the validity of the proposals as to the interests in said wells. Failing in that action, Fuel Products, Inc. and Pear Resources, Inc. conditionally accept your proposal for drilling the captioned wells but subject to such clarification and the execution of all required documents necessary to satisfy the aforementioned exceptions.
