Santa Fe, NM 87504

STATEMENT OF THE CASE

APPLICANT

Applicant seeks an order authorizing the injection of water into the Paddock and Blinbry members of the Glorieta-Yeso formation, Empire East Yeso Pool (96610) in Eddy County, New Mexico. Applicant is the operator of the following well:

W-11 3/25/10

Mesquite State No. 15
API No. 30-015-34496
1750' FSL & 990' FWL (Unit L)
Section 20
T-17-S, R-29-E, NMPM
Eddy County, New Mexico

Mesquite State No. 15 well is drilled to a total depth of 5415' and was originally operated as a producing oil well. COG proposes to convert and utilize the well for injection of water through a closed system into the Paddock and Blinebry formations, Empire East Yeso Pool, through perforations within the depths of 3,873' to 4,214' (Paddock) and 4,336' to 5,289' (Blinebry). Data from injection will be utilized to evaluate the feasibility of secondary recovery operations in the referenced formations.

Injection operations through the well will be conducted at an anticipated average daily injection pressure of 2,000 psi with a maximum surface injection pressure of 2,000 psi or as permitted by the Division, in excess of a 0.2 psi/ft. gradient. Applicant proposes injection of water at average daily rates of approximately 1,000 bbls and at maximum daily rates of approximately 2,000 bbls. The source of the injected fluids will be formation water from production wells that have been drilled and are scheduled to be drilled in the area.
