STATE OF NEW MEXICO )

) ss.

COUNTY OF SAN JUAN )

George Sharpe, being first duly sworn, states as follows:

1. I am employed as the Manager of Investments at Merrion Oil & Gas Corporation (MOG).
2. MOG is the Applicant in New Mexico Oil Conservation Division (NMOCD) Case No. 14540
3. NMOCD Case No. 14540 – an application for compulsory pooling – is scheduled to be heard by the NMOCD Hearing Examiner on September 16, 2010.
4. By certified – return receipt requested letter dated August 10, 2010, a copy of which is attached hereto as Exhibit No. 1, MOG provided to all uncommitted interest owners written notification of the application and hearing in Case No. 14540. A list of the names of those interest owners, together with their last known mailing address is attached hereto as Exhibit 2 and a copy of the return receipt, if applicable, is attached hereto as Exhibit No. 3. A tracking list of the efforts made to contact the return to senders is attached hereto as Exhibit No. 4.
5. In addition to the certified letter dated August 10, 2010, MOG published notice of the application and hearing in Case No. 14540 in the Farmington Daily Times. A copy of the legal advertisement and a copy of an Affidavit of Publication is attached hereto as Exhibit No. 5.
6. MOG conducted a good faith, diligent effort to find the correct addresses for all persons entitled to notice pursuant to the rules of the NMOCD.
7. MOG has given notice at the correct address for each person entitled to notice or has notified each such person by publication, all as required by 19.15.14.1210 NMAC.

8. Based on the foregoing, MOG has complied with the notice provisions of 19.15.14.120 NMAC.

Dated this 14<sup>th</sup> day of September, 2010

**RE: PROPOSAL TO DRILL – GLADE PARK #1 AND #2  
W/2 SECTION 9, T29N, R13W  
SAN JUAN COUNTY, NEW MEXICO**

**NOTIFICATION OF COMPULSORY POOLING APPLICATION  
NOTICE OF PLAN TO COMMINGLE**

To Unleased Mineral Owners:

Merrion Oil & Gas (Merrion) is proposing to drill two Fruitland Coal / Pictured Cliffs wells in the west half of Section 9, T29N, R13W. You may remember getting a similar letter two years ago. The wells were never drilled, our proposals expired, and so we are repeating the process.

Our title review indicates that you own unleased mineral rights on this land as summarized in Attachment 1. You have a number of choices as to what you may do with the interest. Your options are listed below:

1. **Option 1 - participate in the wells, where you would pay your proportionate share of the drilling, completion, and ongoing operating costs and would receive your proportional share of the production.** Attachment 2 is estimated drilling costs for each well, and Attachment 3 shows an example calculation of how much a 1 acre parcel would own of each well on a proportionately reduced basis, and calculates what the estimated total exposure would be (\$3200 drilling and completion cost) if the owner of that parcel participated in the wells. Participating in the wells is risky, and if you do so, you need to be prepared to lose that much money. However, if the wells are successful, they may provide a decent return on your investment.
2. **Option 2 - lease to Merrion Oil & Gas. Merrion would pay you \$50 per net acre and you would retain a 15% royalty interest.** Therefore, if you own 1 acre of minerals, you would receive an upfront check for \$50 and a royalty interest of 15% proportionately reduced to the spacing unit (similar calculation as shown in Attachment 3). You would have no obligation to pay ANY costs associated with drilling, producing, or plugging the wells. **NOTE: The lease calls for no well to be drilled on your surface without your expressed written permission.** We intend to drill these wells on city owned property.
3. **If you do not choose one of the above options, your interest will be subject to the terms and provisions of any compulsory-pooling order that may be issued by the NMOCD.** The rules of the State provide for the "compulsory pooling" of non-committed interests so that one or more owners within a spacing unit are not able to deny the right of other owners to drill and access their minerals. Merrion will be starting the compulsory pooling process parallel with our efforts to sign individuals up for one of the above

options. A hearing has been requested before the New Mexico Oil Conservation Division (NMOCD) on September 16, 2010 beginning at 8 a.m. as part of the process. If your interest is compulsory-pooled, you would receive a 12.5% royalty proportionally reduced to your mineral acreage on revenue. The compulsory-pool order would also provide that Merrion would pay all up-front costs and would receive the balance of your proportional share of the operating profit on each well until Merrion recovered the costs plus a penalty assessed for the risk assumed by Merrion on your behalf. At that point, you would own a 100% working interest proportionally reduced to your acreage, and would pay your full share of all operating costs and receive your full share of all revenue.

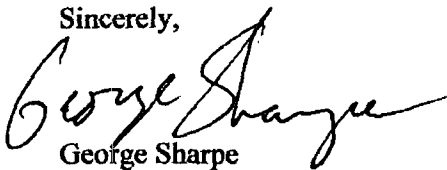

Attachment 5 is a copy of Merrion's application for compulsory pooling on these two wells. Merrion has requested an September 16<sup>th</sup> hearing date to give all parties adequate time to review the options and make an informed decision. If you choose not to elect one of the first two options above and you oppose Merrion's application, then you may choose to participate in the hearing process by notifying the NMOCD in writing of your desire to participate prior to the hearing, by filing a pre-hearing statement with the NMOCD in accordance with its rules, and by attending the hearing. The mailing address for the NMOCD and the location of the hearing is 1220 S. St. Francis Dr., Santa Fe, NM 87505.

Merrion also intends to commingle the two formations in each wellbore, so that we don't have to drill separate wells for each formation. Attachment 6 is a notice in that regard. As an unleased mineral owner, you have the right to object to the commingling by either notifying me or notifying the NMOCD in Aztec (1000 Rio Brazos Rd, Aztec, NM 87410) within 20 days of receipt of this letter.

Please indicate on the attached Option Summary which of the first two options you choose and follow the directions for that option. Again, a non-response will ultimately go through the compulsory pooling process.

I know this can be very confusing, and I have done my best to put the options into laymen's terms. However, it is likely I have fallen short. Therefore, if you have any specific questions as to your mineral interest or your options, please give me a call and I will do my best to give you answers.

Sincerely,

George Sharpe  
Investment Manager

Basin Fruitland Coal Pool – W/2 of Section 9  
West Kutz Pictured Cliffs Pool – NW/4 of Section 9 (Glade Park 1)  
West Kutz Pictured Cliffs Pool – SW/4 of Section 9 (Glade Park 2)  
T29N - R13W, San Juan County, New Mexico**

Dear Ms Davidson:

Merrion Oil & Gas plans to drill the Glade Park #1 and #2 wells to develop the Fruitland Coal and the Pictured Cliffs formations in the W/2 of Section 9, T29N, R13W within the city limits of Farmington. We plan to complete and commingle the Pictured Cliffs and the Fruitland Coal formations in each wellbore.

Because we are in the city limits of Farmington, the ownership is complex, with dozens of different mineral and leasehold owners. Merrion anticipates that not all of the owners will choose to either lease or participate in the drilling of the wells. **Therefore, the purpose of this application is to compulsory pool the Basin Fruitland Coal Pool on the 320 acre tract in the W/2 of Section 9, and to compulsory pool the West Kutz Pictured Cliff Pool on 160 ac tracts in each of the quarter sections.** We ask that these compulsory pooling requests be joined in the same hearing process. **We request that this matter be set for hearing on your September 16, 2010 docket.**

Merrion requests that the compulsory pooling be subject to the following terms and conditions:

1. Merrion be named as operator.
2. Provisions be included for applicant and all working interest owners to participate in the costs of drilling, completing, equipping, and operating the wells.
3. In the event a mineral owner or working interest owner fails to elect to participate in the wells, then provisions be included to recoup out of production, the costs of drilling, completing, equipping, and operating the wells, including a risk factor penalty of 200%.
4. Provisions for overhead rates per month drilling and per month operating and a provision providing for a method of adjusting the overhead rates as provided

by COPAS.

5. For such other and further relief as may be proper.

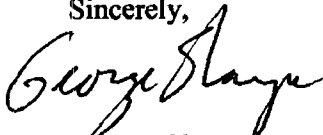

**OTHER ASSOCIATED APPLICATIONS**

Merrion is aware that it will need NMOCD approval on a number of other applications. We will need approval for Downhole Commingling (DHC) and Non-Standard Locations (NSL) for both wells. Applications for DHC, NSL will be submitted for approval through the administrative process.

**NOTIFICATION**

Attached is a list of all mineral owners and leasehold owners who received copies of this application through certified mail. Tommy Roberts, our attorney, will be preparing a prehearing statement and will represent Merrion Oil & Gas at the hearing. Please let me know if you have any questions or issues with our application.

Sincerely,

**Production Allocation Methodology  
Commingling of Basin Fruitland Coal Pool  
And West Kutz Pictured Cliffs Pool  
Glade Park 1 & 2 Wells  
W/2 Section 9, T29N, R16W  
San Juan County, New Mexico**

It is recommended that production be allocated between the Basin Fruitland Coal Pool and the West Kutz Pictured Cliffs Pool for the subject wells based on the performance of nearby offset wells. Exhibit 1 is an Estimate Ultimate Recovery (EUR) map of a 23 section study area surrounding the subject lands. Pictured Cliffs (PC) EUR's are represented by semi-circles on the right, and Fruitland Coal EUR's are represented by semi-circles on the left of each well symbol. As can be seen from the map, while EUR's in the area vary for both formations, in general, the PC and the Fruitland Coal are statistically similar in their performance.

Type curves were made of all the currently producing wells in the 23 section study area. The Fruitland Coal type curve is shown in Figure 2 while the PC type curve is shown in Figure 3. Again, except for a slight dewatering period for the Fruitland Coal, the performance of the two zones is relatively similar. Based on the type curve, an "average" Fruitland Coal completion in the area is estimated to have an ultimate recovery of 657 MMCF and 61.4 MBbls of water, while an "average" PC completion is projected to have an ultimate recovery of 859 MMCF and 88.6 MBbls of water.

Because of the difficulty in obtaining accurate production tests during the dewatering period on the coal, and because of the inaccuracy of using these tests for allocation over the life of a well, it is recommended that production be split between the Fruitland Coal and the PC based on the "average" ultimates from the type curves. On that basis, the following allocation is recommended:

<u>Formation</u>	<u>Gas Allocation</u>	<u>Water Allocation</u>
Fruitland Coal	43.3%	40.1%
Pictured Cliffs	56.7%	59.9%

**Production Allocation Methodology  
Commingling of Basin Fruitland Coal Pool  
And West Kutz Pictured Cliffs Pool  
Glade Park 1 & 2 Wells  
W/2 Section 9, T29N, R16W  
San Juan County, New Mexico**

It is recommended that production be allocated between the Basin Fruitland Coal Pool and the West Kutz Pictured Cliffs Pool for the subject wells based on the performance of nearby offset wells. Exhibit 1 is an Estimate Ultimate Recovery (EUR) map of a 23 section study area surrounding the subject lands. Pictured Cliffs (PC) EUR's are represented by semi-circles on the right, and Fruitland Coal EUR's are represented by semi-circles on the left of each well symbol. As can be seen from the map, while EUR's in the area vary for both formations, in general, the PC and the Fruitland Coal are statistically similar in their performance.

Type curves were made of all the currently producing wells in the 23 section study area. The Fruitland Coal type curve is shown in Figure 2 while the PC type curve is shown in Figure 3. Again, except for a slight dewatering period for the Fruitland Coal, the performance of the two zones is relatively similar. Based on the type curve, an "average" Fruitland Coal completion in the area is estimated to have an ultimate recovery of 657 MMCF and 61.4 MBbls of water, while an "average" PC completion is projected to have an ultimate recovery of 859 MMCF and 88.6 MBbls of water.

Because of the difficulty in obtaining accurate production tests during the dewatering period on the coal, and because of the inaccuracy of using these tests for allocation over the life of a well, it is recommended that production be split between the Fruitland Coal and the PC based on the "average" ultimates from the type curves. On that basis, the following allocation is recommended:

<u>Formation</u>	<u>Gas Allocation</u>	<u>Water Allocation</u>
Fruitland Coal	43.3%	40.1%
Pictured Cliffs	56.7%	59.9%
