These units are hereinafter collectively referred to as the "Unit Approval Orders."

2. Each of the Unit Approval Orders authorizes the allocation of commingled production by either the subtraction or fixed allocation method.

3. The allocation of production in certain new commingled wells by the use of a gas composition analysis has been approved by the Division but the Unit Approval Orders that limit allocation to the subtraction and fixed allocation methods may prevent its use.

4. ConocoPhillips therefore seeks amendment of each of the Unit Approval Orders by the addition of a finding that provides: "Nothing in this order shall prevent the use of alternative methods for the allocation of commingled production where the method has been or subsequently is approved by the Division prior to commingling."

5. The proposed amendment of each of the Unit Approval Orders is in the interest of conservation, the prevention of waste and protection of correlative rights and should be approved.

WHEREFORE, ConocoPhillips Company and Burlington Resources Oil & Gas Company LP request that this application be set for hearing before an Examiner of the Oil Conservation Division on September 30, 2010, that notice be given as required by law and the rules of the Division, and that this application be granted.
