RE: Jillison Federal SWD #1  
Saltwater Disposal Well  
SE/4 NW/4 Section 8, T-24-N, R-3-W  
Rio Arriba County, New Mexico

Dear Mr. Lelay:

This letter is to voice our objection to the proposed waste water well. The following are our objections.

1. Our water well is within one quarter mile of the proposed waste well.
2. We have no guarantee that our water well, will not be contaminated by the proposed waste well.
3. We own property in Sections 8,9,15,16,17,18,19,20,22,29, and 32, all in T-24 N, R-3 W and have several other water wells in some of the section.
4. There is already a existing waste water well within one mile of the proposed waste water well.
5. At this time we are in a land exchange agreement with BLM in Sections 4,5,6,7 and 8 which includes the proposed waste water site, if we do exchange we would have to live with that.

Your speedy action in this matter will be greatly appreciated. Please contact me at (505)325-6596 after 3:00 p.m., if you have any questions concerning this matter.

Sincerely,

Paul M. Candelaria
