Re: Schultz Com B Well No. 6, M-16-29N-10W
Application of Meridian Oil Inc.
for downhole commingling,
San Juan County, New Mexico

Dear Mr. Stogner:

On behalf of Meridian Oil Inc., please find enclosed our referenced application which we request be set for hearing on the next available Examiner's docket now scheduled for December 1, 1994.

By copy of this letter and application, sent certified mail, we are notifying all interested parties of their right to appear at the hearing and participate in this case, including the right to present evidence either in support of or in opposition to the application and that failure to appear at the hearing may preclude them from any involvement in this case at a later date

NMOCD Application
Meridian Oil Inc.

PROPOSED ADVERTISEMENT

Case 1115: Application of Meridian Oil Inc. for downhole commingling, San Juan County, New Mexico. Applicant, in the above-styled cause, seeks approval to downhole commingle conventional Aztec-Pictured Cliffs Gas Pool gas production (155.24-acre non-standard dedication comprising Lots 10,11,12 and 13, being SW/4 equivalent) with coal gas production from the Basin-Fruitland Coal Gas Pool (313.04 standard dedication comprising Lots 2,3,4,5,10,11,12 and 13, being W/2 equivalent) within the wellbore of its Schultz Com B Well No. 6 located 990 feet from the South line and 990 feet from the West line (Unit M) of Section 16, T29N, R10W, NMPM. Said well is located approximately 3.5 miles west of Blanco, New Mexico. **IN THE ABSENCE OF OBJECTION, THIS APPLICATION WILL BE TAKEN UNDER ADVISEMENT.**

STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
DIVISION FOR THE PURPOSE OF
CONSIDERING:

APPLICATION OF MERIDIAN OIL INC.
FOR DOWNHOLE COMMINGLING,
SAN JUAN COUNTY, NEW MEXICO.

NOV 10 1993
OIL CONSERVATION DIVISION
CASE: 1151

APPLICATION

Comes now MERIDIAN OIL INC., ("Meridian") by and through its attorneys, Kellahin and Kellahin, and applies to the New Mexico Oil Conservation Division for approval to downhole commingle conventional Aztec-Pictured Cliffs Gas Pool gas production (155.24-acre non-standard dedication comprising Lots 10,11,12 and 13, being SW/4 equivalent) with coal gas production from the Basin-Fruitland Coal Gas Pool (313.04 standard dedication comprising Lots 2,3,4,5,10,11,12 and 13, being W/2 equivalent) within the wellbore of its Schultz Com B Well No. 6 located 990 feet from the South line and 990 feet from the West line (Unit M) of Section 16, T29N, R10W, NMPM.

In support of its application, Meridian states:

(1) Meridian is the operator of the Schultz Com B Well No. 6 in Section 16, T29N, R10W, NMPM, San Juan County, New Mexico which currently is a single completion well within a previously approved 155.24-acre non-standard gas proration and spacing unit for production from the Aztec-Pictured Cliffs Gas Pool. See Exhibit "A" attached.

(2) The well is to be recompleted so that production from the Basin-Fruitland Coal Gas Pool and the Pictured Cliffs formation can be downhole commingled in the wellbore.

(3) The ownership is not common for the well and its respective spacing and proration units in both pools.

(4) In accordance with Division Rule 303-C-1.(b), the Applicant states and will demonstrate at hearing:

1. the downhole commingling in this wellbore is necessary because evidence indicates that the Pictured Cliffs production from this well in this well is now marginally productive and any remaining Pictured Cliffs production will have to be abandoned unless it is downhole commingled with Basin Fruitland Coal Gas production. In addition, it is not economic to attempt to dually complete those formations in this well;

2. there will be no crossflow between the two zones commingled;

3. neither commingled zones exposes the other to damage by produced liquids;

4. the fluids from each zone are compatible with the other;

5. it is expected that the bottom hole pressure of the lower pressure zone is not less than 50 percent of the bottom hole pressure of the higher pressure zone adjusted to a common datum.

6. the value of the commingled production will not be less than the sum of the values of the individual production.

(5) The proposed downhole commingling is necessary in order for the applicant to economically recover Basin-Fruitland Coal Gas and Pictured Cliffs Gas Pool reserves underlying each respective proration unit.

(6) Due to the nature of the Basin-Fruitland Coal Gas production, straight allocation of gas volumes from both zones is not appropriate. Meridian therefore seeks the adoption of a monthly allocation formula to be presented at the time of the hearing.

(7) Applicant requests that this matter be docketed for hearing on the Division's Examiner docket now scheduled for December 1, 1994.

(8) A copy of this application is being sent to all owners of production within each of the respective spacing units for the well who may be affected by downhole commingling.

(9) Copy of this application has been sent to all offsetting operators to the two spacing units for the well as shown on Exhibits "B" and "C".

WHEREFORE Applicant requests that this matter be set for hearing on December 1, 1994 before a duly appointed Examiner of the Oil Conservation Division and that after notice and hearing as required by law, the Division enter its order granting this application.

Respectfully submitted

W. Thomas Kellahin
