FOR STATUTORY UNITIZATION, EDDY  
COUNTY, NEW MEXICO.**

*CASE No. 11298*

*Order No. R-10460-A*

NUNC PRO TUNC ORDER

BY THE DIVISION:

It appearing to the New Mexico Oil Conservation Division ("Division") that Order No. R-10460, dated September 18, 1995, does not correctly state the intended order of the Division.

IT IS THEREFORE ORDERED THAT:

(1) Finding Paragraph No. (29) on page 9 of said Order No. R-10460, be and the same, is hereby amended to read in its entirety as follows:

" (29) Injection should be accomplished through lined or otherwise corrosion-resistant tubing installed in a packer set within 300 feet of the upper most injection perforation; the casing-tubing annulus in each well should be filled with an inert fluid and equipped with an approved gauge or leak-detection device. The supervisor of the Artesia District Office of the Division may authorize the setting of the casing-tubing isolation device at a shallower

depth if appropriate."

(2) Finding Paragraph No. (30), also on page 9 of said Order No. R-10460, be and the same, is hereby amended to read in its entirety as follows:

" (30) Prior to commencing injection operations, each injection well should be pressure tested throughout the interval from the surface down to the proposed upper most perforation to assure mechanical integrity of each well."

(3) Decretory Paragraph No. (10) on page 12 of said Order No. R-10460, be and the same, is hereby amended to read in its entirety as follows:

" (10) Injection shall be accomplished through lined or otherwise corrosion-resistant tubing installed in a packer set within 300 feet of the upper most injection perforation; the casing-tubing annulus in each well shall be filled with an inert fluid and equipped with an approved gauge or leak-detection device. The supervisor of the Artesia District Office of the Division can authorize the setting of the casing-tubing isolation device at a shallower depth if appropriate."

(4) Decretory Paragraph No. (13), also on page 12 of said Order No. R-10460, be and the same, is hereby amended to read in its entirety as follows:

" (13) Prior to commencing injection operations, each injection well shall be pressure tested throughout the interval from the surface down to the proposed upper most perforation to assure mechanical integrity of each well."

(5) The corrections set forth in this order be entered nunc pro tunc as of September 18, 1995.

DONE at Santa Fe, New Mexico, on this 25th day of October, 1995.
