Commissioner William W. Weiss
Chairman William J. LeMay
Oil Conservation Division

RE: Case No. 11352, Application of New Mexico Oil Conservation Division
to Amend Rule 116 of its General Rules and Regulations Pertaining to
the Notification of Fires, Breaks, Leaks, Spills and Blowouts

Dear Commissioners:

On March 5, 1997, El Paso Natural Gas company, Burlington Resources Oil and Gas Company, Amoco Production Company, and PNM Gas Service ("Affected Parties") filed an Application for Rehearing of the above captioned matter. As a natural gas gathering system owner and operator in New Mexico, Williams Field Services Company ("WFS") would also be adversely affected by the rule amendment. WFS would like to express its support of the Affected Parties' Application. WFS strongly believes that given adequate notice, parties could present evidence to demonstrate that the reporting requirements are overly burdensome and that less onerous, reasonable reporting requirements could still accomplish the Commission's goals. Therefore, WFS urges the Commission to grant the Affected Parties' Application and rehear the natural gas reporting requirements of Rule 116.

Sincerely,

Warren O. Curtis
