RE COMMENTS ON ABOVE ORDERS.

Finding (12) : during 1995 I did not contact Yates;I recall that Yates had asked about a special case where they could test some wells at high rates ,however they never followed up on this.

My first contact with Yates about the above subject was 3/15/96. At this meeting I Asked Yates how did they want to address the overproduction issue;they would have to check with management and get back with me.

The last meeting was on 4/10/96 in which they would restrict production on 7 proration units that was currently overproduced in the next couple of days and would call a hearing.

FINDINGS (14 & 15) No contact or meetings with Yates concerning the South Dagger Draw.They just volunteered that the South Dagger Draw was over produced in calling the hearing.

FINDINGS (17 & 18) What about the case where a unit was overproduced but is currently producing less than 350 bopd?

FINDING (22) who will form the "Operator's Committee "

This looks like a good and fair order.TWG

If additional comments needed just howler.
