Mike I appreciate you getting on this quickly. On thursday I met with Mr. Payne and received his bargaining points, which I believe you've seen. Some of my comments you have already received. Gary will be working on his comments today. We really need to have this order out by the end of this week or early next week. In my discussions with Mr. Payne, I still don't think he thinks we are serious about doing anything. I believe the order will be a wake up call for him. Also, we should have the Meteor information pulled together by the end of next week. Thanks Chris

Subject: Case 11812

This case was heard with great interest on the August 21st hearing. Both Rand and Chris have requested that this matter be expedited. I met with Jim Bruce and Rand, counsel for both parties to appear in this case, today. Both are preparing a draft order in this matter and should have it available to me tomorrow morning.

I concur, a timely order by the Division in this matter is of great importance.

I am therefore notifying you that in preparing my final draft for your signature a certain amount of my time this week will be needed for such review and preparation.
