Rand, Weldon's Roustabout Service was selected as contractor to fix the fence and repair the dike around the SPRR battery that Meteor had operated. Weldon's was low bidder from earlier E-Mail 8/7/97. Just before the repairs were to start there was a fire at the battery. Once the fire was out I requested that Weldon's hire a truck to empty out the vessels, since the liquids in them were helping to fuel the fire. Gandy Corp. picked 390 bbls of fluid. Approximately 331 bbls was oil that was processed and sold to Navajo Refinery. After processing fees and charges for trucking the fluid and setting up an escrow account for receiving the money from the sale of oil, there should be approximately \$3500 to \$4500 to put into the account. The money should be held there until after the hearing on the issues surrounding Meteor.

The money will be held in escrow until a determination can be made to Meteor's responsibilities.
