Hand Delivered

Michael E. Stogner Oil Conservation Division 2040 South Pacheco Street Santa Fe, New Mexico 87505

Dear Mr. Stogner:

This letter is submitted in response to your letter of August 13, 1998 addressed to Mallon Oil Company ("Mallon"), regarding its application for administrative approval of an unorthodox gas well location for the following well:

Jicarilla 464-30 Well No. 10 API No. 30-039-25788 1700 feet FNL & 800 feet FWL (Lot 2) §30, Township 30 North, Range 3 West, NMPM Rio Arriba County, New Mexico

The well was drilled under Division Administrative Order NSP-1786(L), issued for the East Blanco-Pictured Cliffs formation. However, the San Jose and Nacimiento formations are the producing formations. Both formations are subject to statewide rules, with 160 acre well units, and wells to be located no closer than 790 feet to the outer boundary of the well unit nor closer than 130 feet to a quarter-quarter section line.

At this time, pursuant to Division Rule 104.D.(2), Mallon requests approval of a non-standard gas spacing and proration unit for the well consisting of Lots 1, 2, and the NE½ (N½ equivalent) of Section 30, containing 246.46 acres.² Attached as Exhibit A is the

 $^{^{1}\}text{I}$ have been informed that the location was also approved by Division Order No. R-8774. I have not reviewed that order.

²I have been informed that Mallon has discussed this proposed well unit with the Division's Aztec office, which has no objection.

Form C-102 for the well, marking the well location and outlining the proposed well unit. The non-standard unit is necessitated by a variation in the United States public land surveys: Section 30 is comprised of Lots 1-6, the NE¼, and the N½SE¼, containing 519.21 acres. Approval of the non-standard unit means the unorthodox location is no longer necessary.

Attached as Exhibit B is a land plat of the area. Sections 29-32 are owned and operated by Mallon, and royalty and overriding royalty ownership is common in those sections. The acreage immediately to the west of section 30 is operated by Robert L. Bayless, who has been notified of this application by certified mail. A copy of the notice letter is attached as Exhibit C.

Based on the foregoing, Mallon requests approval of the above non-standard gas spacing and proration unit. Please call me if you need anything further on this matter.

Very truly yours,

James Bruce

Dear Mr. Bayless:

Mallon Oil Company has filed an administrative application for approval of a non-standard gas spacing and proration unit with the New Mexico Oil Conservation Division. A copy of the application is enclosed. If you object to the application, you must notify the Division in writing no later than Monday, September 14, 1998. The Division's address is 2040 South Pacheco Street, Santa Fe, New Mexico 87505 (Attention: Michael E. Stogner).

Very truly yours,

hames gruce
