ATTEN: MARK ASHLEY
FROM: BRYAN ARRANT

Mark,

The tops noted on this log are compared to a well in Sec. 36-16-31 in Unit H, the Brinson #4. Larry Brooks correlated the tops on that log and I picked the tops on the Kenedy Federal #2. My picks as you can see are slightly different from the tops on who ever wrote on this log. The Grayburg top is an estimate, but should be very close. The Queen top is picked incorrectly. I think it should be above 3000' where it was not logged. THE G.L. should read @4058', not 4065', that's the K.B.
