

EXHIBIT No. 7  
Case No. 12193

These are pages of *U.S.G.S. Professional paper 676 , Geology and Fuel Resources of the Fruitland Formation and Kirtland Shale of the San Juan Basin, New Mexico and Colorado*, By James E. Fassett and Jim S. Hinds.

Title Page, is presented to show the source of the material.

Page 5, Electric-Log Interpretation, is presented to identify that the coal seams are considered to be portions of the Fruitland formation.

Page 43, Oil and Gas, is presented to show their interpretation of the outcrop of the Fruitland formation - inside the ring, the Fruitland is below ground, outside the ring, the Fruitland has been eroded away.

Township 31 North, Range 13 West is highlighted in yellow to show that the location of the subject well, near the west boundary, is very near the outcrop.
