

# OXY PROPOSAL

**Cease disposal into the Bone Springs pool in the Government AB-9 well  
when any of the following occurs:**

1. Water breakthrough in any offset Bone Springs producer located within  
½ mile of the well (Government AB-7, AB-8, S-3 or S-7); or
2. Detection of a significant pressure increase between intermediate and  
production casings on the Government S-2 or the Government AB-2.

## MONITORING PROGRAM

- Periodic well tests on Bone Springs producers; and
- Install pressure gauges on intermediate/production casing annulus on S-2  
& AB-2 wells. Monitor and record weekly.
