APPLICATION OF SANTA FE SNYDER

NEW MEXICO.

Case No. 12362

APPLICATION

Santa Fe Snyder Corporation seeks creation of the North Cass Draw-Wolfcamp Pool, special pool rules therefor, and approval of an unorthodox oil well location. In support thereof, applicant states:

1. Applicant is operator of the Weems Well No. 1, located 990 feet from the north line and 1330 feet from the west line (Unit C) of Section 27, Township 22 South, Range 27 East, N.M.P.M.

2. On or about February 6, 2000, applicant re-completed the Weems Well No. 1 in the Wolfcamp formation at a depth of 9062-9114 feet subsurface.

3. The Weems Well No. 1 is within one mile of the East Carlsbad-Wolfcamp Gas Pool and the Cass Draw-Wolfcamp Gas Pool, which are gas pools developed on statewide rules with 320 acres well spacing. However, the Weems Well No. 1 is an oil well under Division regulations, and the Division's District Office has so classified the well. As a result, applicant requests that a new pool, designated the North Cass Draw-Wolfcamp Pool, be created by the Division. The original boundaries of the pool should encompass the NW $\frac{1}{4}$ of Section 27.

4. The Weems Well No. 1 is capable of draining more than 40 acres. Therefore, applicant requests promulgation of special pool rules for the North Cass Draw-Wolfcamp Pool, providing for 160 acre well spacing and for orthodox well locations no closer than 330 feet to a quarter-quarter section line. Applicant further requests that the special pool rules be effective as of February 1, 2000.

5. Applicant requests that the unorthodox location for the Weems Well No. 1 be approved.

6. The granting of this application is in the interests of conservation and the prevention of waste.

WHEREFORE, applicant requests that, after notice and hearing, the relief requested above be granted.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "James Bruce", is written over a horizontal line.
