**STATEMENT OF
RAPTOR RESOURCES, INC.**

CASE 12563

**APPLICATION OF THE NEW MEXICO OIL CONSERVATION DIVISION
FOR TERMINATION OF GAS PRORATIONING IN THE
JALMAT AND EUMONT GAS POOLS
AND TO AMEND THE SPECIAL POOL RULES GOVERNING BOTH POOLS,
LEA COUNTY, NEW MEXICO**

September 6, 2001

Raptor Resources, Inc. is the largest operator of gas wells in the Jalmat Gas Pool with 140 wells and current natural gas production of approximately 7500 MCF/D.

Raptor acquired its interests in the Jalmat Gas Pool in 1998 and embarked on a redevelopment program, which included the drilling of 14 wells during calendar years 1999 and 2000. The results of this program have demonstrated that there are substantial recoverable reserves in the Jalmat Gas Pool which cannot be recovered by the existing wells in this pool. Furthermore, Raptor has established that produced gas obtained from its Redevelopment Program is in fact incremental reserves – not just an acceleration in recovery from previously developed Jalmat wells.

Raptor Resources, Inc. supports the amendments proposed by the New Mexico Oil Conservation Division to the Special Pool Rules and Regulations of the Jalmat Gas Pool. We believe that the adoption of these amendments will enable operators in the Pool to further develop the Jalmat Gas Pool by completing in intervals not previously produced and/or inadequately developed and will permit operators to do so in a manner consistent with current technology. The requirement in the proposed amendments for information demonstrating that wells on a density less than 160 acres will assure that increased well density will be allowed in the pool only where necessary. At the same time, the administrative procedures authorized by these rules, and the notice requirements contained therein, will avoid unnecessary hearings while protecting the correlative rights of the interest owners in the pool.

The Division's proposed amendments to these rules and the termination of prorationing in this pool will encourage further development of these resources under a regulatory scheme which addresses the physical characteristics of this reservoir and the rights of the owners therein.

Raptor
