**APPLICATION OF THE NEW MEXICO OIL CONSERVATION DIVISION,
THROUGH THE SUPERVISOR OF DISTRICT III, FOR AN ORDER
REQUIRING OPERATORS TO BRING ONE HUNDRED TWENTY-ONE (121)
WELLS INTO COMPLIANCE WITH RULE 201.B, AND ASSESSING
APPROPRIATE CIVIL PENALTIES; SAN JUAN, RIO ARRIBA, SANDOVAL
AND MCKINLEY COUNTIES, NEW MEXICO**

CASE NO. 12739

APPLICATION FOR COMPLIANCE ORDERS AND CIVIL PENALTIES

1. Chapparral Energy, Inc. is the operator of one (1) wells in Rio Arriba County, New Mexico, specifically identified by name, exact location and API number on Exhibit A. Exhibits A and B are attached hereto and by this reference incorporated into this application and made part hereof for all purposes.

2. Clayton Investment Co. is the operator of one (1) well in San Juan County, New Mexico, specifically identified by name, exact location and API number on Exhibit A.

3. Coulthurst Mgt Inv Inc. is the operator of twelve (12) wells in Sandoval County, New Mexico, specifically identified by name, exact location and API number on Exhibit A.

4. Hart Oil & Gas, Inc. is the operator of six (6) wells in San Juan County, New Mexico specifically identified by name, exact location and API number on Exhibit A, and also thirty-four (34) additional wells in San Juan County, New Mexico, so identified on Exhibit B.

5. J. C. Well Service is the operator of five (5) wells in San Juan County, New Mexico, specifically identified by name, exact location and API number on Exhibit A, and also five (5) additional wells in San Juan County, New Mexico, so identified on Exhibit B.

6. Jimmy Robertson Energy Corp. is the operator of six (6) wells in San Juan County, New Mexico, specifically identified by name, exact location and API number on Exhibit A.

7. Julius Chodorow is the operator of one (1) well in San Juan County, New Mexico specifically identified by name, exact location and API number on Exhibit A.

8. Keystone Energy, LLC is the operator of one (1) well in Rio Arriba County, New Mexico, specifically identified by name, exact location and API number on Exhibit A.

9. La Quinta Oil Co. is the operator of two (2) wells in Sandoval County, New Mexico, specifically identified by name, exact location and API number on Exhibit A.

10. Manana Gas Inc. is the operator of two (2) wells in San Juan County, New Mexico, specifically identified by name, exact location and API number on Exhibit A.

11. Mountain States Petroleum Corp. is the operator of nine (9) wells in San Juan County, New Mexico, specifically identified by name, exact location and API number on Exhibit B.

12. N.M.&O. Operating Co. is the operator of five (5) wells in Rio Arriba County, New Mexico, specifically identified by name, exact location and API number on

Exhibit A, and of four (4) additional wells in Rio Arriba County, New Mexico so identified on Exhibit B.

13. Noel Reynolds is the operator of one (1) well in San Juan County, New Mexico and one (1) well in Rio Arriba County, New Mexico, specifically identified by name, exact location and API number on Exhibit A.

14. Phoenix Hydrocarbons Operating Corp. is the operator of one (1) well located in San Juan County, New Mexico, specifically identified by name, exact location and API number on Exhibit A, and of one (1) additional well in San Juan County so identified on Exhibit B.

15. R-J Enterprises is the operator of three (3) wells in McKinley County, New Mexico, specifically identified by name, exact location and API number on Exhibit A, and also one (1) well in San Juan County, New Mexico, so identified on Exhibit B.

16. Smokey Oil Company is the operator of one (1) well in Rio Arriba County, New Mexico, specifically identified by name, exact location and API number on Exhibit A.

17. TASCOS is the operator of six (6) wells located in San Juan County, New Mexico, specifically identified by name, exact location and API number on Exhibit A, and of two (2) additional wells in San Juan County, New Mexico so identified on Exhibit B.

18. Torreon Oil Co. is the operator of five (5) wells located in Sandoval County, New Mexico, specifically identified by name, exact location and API number on Exhibit A attached hereto, and of two (2) additional wells in Sandoval County, New Mexico so identified on Exhibit B.

19. U.S. Enercorp, LLC is the operator of two (2) wells in Sandoval County, New Mexico, specifically identified by name, exact location and API number on Exhibit A, and also one (1) additional well in Sandoval County, New Mexico, so identified on Exhibit B.

20. The above named operators are herein referred to collectively as “Operators” and individually as “Operator.” The wells identified on Exhibit A are herein called “the subject wells,” and the wells identified on Exhibit B are herein called “the additional wells.” The phrase, “each Operator’s subject wells” refers, as to each Operator individually, to those of the subject wells identified on Exhibit A as operated by such Operator. The phrase “each Operator’s additional wells” refers, as to each Operator individually, to those of the additional wells identified on Exhibit B as operated by such Operator. The New Mexico Oil Conservation Division is hereinafter called “the Division.”

21. Each of the subject wells was continuously inactive for a period in excess of one (1) year immediately preceding May 11, 2000, and has remained inactive continuously from such date to the date of filing of this Application. The date of last reported production from, or injection into, each of the subject wells is set forth on Exhibit A. None of the subject wells is currently approved for temporary abandonment by the Division.

22. In the alternative, if there has been any production from, or injection into, any of the subject wells since the date of last production or injection indicated with respect to such well on Exhibit A, such production or injection has not been reported to the Division as required by Rule 1115.

23. On May 11, 2000, the New Mexico Oil Conservation Division (hereinafter “the Division”), acting through the District Supervisor of District III, notified Operators that the subject wells were not in compliance with Division Rule 203.B(3), and should be brought into compliance either by returning the same to production or other beneficial use or by securing Division approval for temporary abandonment. The Division received no response to such notification from any of the above-named Operators, and none of said Operators took any action to bring such Operator’s subject wells into compliance.

24. On September 8, 2000 the Division, acting through the District Supervisor of District III, again notified Operators that the subject wells were not in compliance with Division Rule 201.B(3), and directed Operators to bring such wells into compliance within sixty(60) days following such notification. By subsequent correspondence, Operators were notified that their continued failure to bring the subject wells into compliance would result in their being summoned to a show cause hearing before a Division hearing examiner. The Division received no response to such notifications from any of Operators, and no action has been taken to bring any of the subject wells into compliance.

25. Each Operator’s additional wells, though not referenced in the written notices from the Division to the Operators described above, are also out of compliance with Rule 201.B(3), in that said wells had not been produced or beneficially used for a continuous period of one year prior to June 1, 2001, and have not been restored to production or beneficial use or plugged since that date, nor have applications been filed for temporary abandonment of any of such additional wells. The date of last reported production from, or injection into, each of the additional wells is set forth on Exhibit B.

26. If there has been any production from, or injection into, any of the additional wells since the date of last production or injection reflected on Exhibit B, such production or injection has not been reported to the Division as required by Rule 1115.

27. Division Rule 201.B(3) provides:

A well shall be either properly plugged and abandoned or temporarily abandoned in accordance with these rules ninety (90) days after:

(3) A period of one (1) year in which a well has been continuously inactive.

28. NMSA Section 70-2-31.A provides that:

Any person who knowingly and willfully violates any provision of the Oil and Gas Act or any provision of any rule or order issued pursuant to that act shall be subject to a civil penalty of not more than one thousand dollars (\$1,000) for each violation. For purposes of this subsection, in the case of a continuing violation, each day of violation shall constitute a separate violation.

29. Each Operator's failure to take action to restore such operator's subject wells to production or beneficial use, or to cause such wells to be plugged and abandoned, or to apply to the Division for approval for temporary abandonment, or, if such wells are in fact producing, to report such production to the Division as required, after receipt of notice of noncompliance from the Division as herein before described, constitutes a continuing violation of Division Rule 201.B(3) or of Rule 1115, rules duly adopted by the Division pursuant to the Oil and Gas Act.

WHEREFORE, the Supervisor of District III of the Division hereby applies to the Director to enter an order:

- A. Specifically ordering each of Operators to bring such Operator's subject wells and additional wells into compliance with OCD rules within a specified time fixed in said order by taking one of the following actions with respect to each of said Operator's subject wells:
- (i) causing such well to be plugged and abandoned in accordance with Division rules.
 - (ii) restoring such well to production or other Division-approved beneficial use,
 - (iii) applying to the Division for permission to place such well in "temporary abandonment" status pursuant to Division Rule 203, or
 - (iv) truly and accurately reporting to the Division all production from or injection into any of said wells which has, in fact, occurred and not been reported to the Division.
- B. In those cases where the Director deems such action appropriate, requiring an Operator to furnish single-well financial assurance as to any well that has not been produced or otherwise beneficially used for two (2) consecutive years, pursuant to NMSA 70-2-14.A.
- C. Assessing an appropriate civil penalty against each of Operators for failure to take action to remedy the non-compliance of such Operator's subject wells after notice and demand from the Division

to do so; such penalty to be not less than \$1,000 for each of such
Operator's subject wells.

RESPECTFULLY SUBMITTED,

David K. Brooks

David K. Brooks
