

BEFORE THE NEW MEXICO OIL CONSERVATION DIVISION

APPLICATION OF ARCH PETROLEUM INC. FOR
APPROVAL OF A PILOT PRESSURE MAINTENANCE
PROJECT AND TO QUALIFY THE PROJECT FOR
THE RECOVERED OIL TAX RATE, LEA COUNTY,
NEW MEXICO.

Case No. 12756

APPLICATION

Arch Petroleum Inc. ("Arch") applies for an order approving a pilot pressure maintenance project, and qualifying the project for the recovered oil tax rate. In support thereof, Arch states:

1. Arch is the operator of Federal Oil and Gas Lease LC 030187 as to the Teague Paddock-Blinebry Pool. The lease covers, among other acreage, the E $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 21 and the W $\frac{1}{2}$ NW $\frac{1}{4}$ of Section 22, Township 23 South, Range 37 East, N.M.P.M.

2. Arch proposes to institute a pilot pressure maintenance project on the above-described lease, designated the Teague Pilot Pressure Maintenance Project. Arch's address is P.O. Box 10340, Midland, Texas 79702 (Attention: Terry Gant).

3. Arch proposes to inject water into the Teague Paddock-Blinebry Pool through the C.E. Lamunyon Well No. 79, located 1700 feet from the north line and 10 feet from the east line (Unit H) of Section 21. The initial project area will comprise the E $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 21 and the W $\frac{1}{2}$ NW $\frac{1}{4}$ of Section 22. A plat outlining the project area, and marking the locations of the initial injection and producing wells, is attached hereto as Exhibit A.

4. Arch requests that the Teague Pilot Pressure Maintenance Project be qualified for the recovered oil tax rate, pursuant to the Enhanced Oil Recovery Act (L. 1992, Ch. 38) and Division Rules.

J

Project data includes:

- (a) Number of initial producing wells: 4.
- (b) Number of initial injection wells: 1.
- (c) Capital cost of additional facilities: \$74,000.00.
- (d) Estimated total project cost: \$674,000.00.
- (e) Estimated total value of incremental production recovered from the project: \$1,750,000.00.
- (f) Anticipated injection commencement date: January 1, 2002.
- (g) Type of fluid injected: Produced water.
- (h) Anticipated injection volumes: 1500 BWPD maximum.

5. A Form C-108 for the injection well and project is attached hereto as Exhibit B.

WHEREFORE, Arch requests that the Division approve the injection application and the Teague Pilot Pressure Maintenance Project, including a provision allowing administrative approval for expansion of the project area, qualify the project as an enhanced oil recovery project, and certify the project for the recovered oil tax rate.

Respectfully submitted,

James Bruce

APPLICATION FOR AUTHORIZATION TO INJECT

- I. PURPOSE: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? Yes No
- II. OPERATOR: Arch Petroleum Inc.
- ADDRESS: P. O. Box 10340, Midland, TX 79702-7340
- CONTACT PARTY: Richard L. Wright PHONE: (915)685-8100
- III. WELL DATA: Complete the data required on the reverse side of this form for each well proposed for injection.
Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? Yes No
If yes, give the Division order number authorizing the project: _____
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and,
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- *VIII. Attach appropriate geologic data on the injection zone including appropriate lithologic detail, geologic name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such sources known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- *X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division, they need not be resubmitted).
- *XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground sources of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification: I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

NAME: Mark V. Kelley TITLE: Sr. Petroleum Engineer

SIGNATURE: Mark V. Kelley DATE: 5/8/01

- * If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be resubmitted. Please show the date and circumstances of the earlier submittal: _____

DISTRIBUTION: Original and one copy to Santa Fe with one copy to the appropriate District Office

III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; Location by Section, Township and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District Offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and the name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) The intended purpose of the injection well; with the exact location of single wells or the Section, Township, and Range location of multiple wells;
- (3) The formation name and depth with expected maximum injection rates and pressures; and,
- (4) A notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

Re: Las Cruces 030187

Gentlemen:

Your "Subsequent Report of Abandonment" dated February 6, 1951 concerning well No. 14 La Munyon located 1980 feet from south and west lines of section 22, T. 23S, R. 37E, Teague Pool, Lea County, New Mexico, is hereby approved.

Very truly yours,

M. H. SOYSTER
District Engineer

(SUBMIT IN TRIPPLICATE)

NOTICE OF INTENTION TO <u>PLUG</u> ABANDON WELL	X

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

December 20, 1950

LaMunyon

Well No. 14 is located 1980 ft. from N line and 1980 ft. from E line of sec. 22

Teague SW 1/4 of 22 23S 37E NMMP
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Teague Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3296 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

TD - 9580, PB, TD - 9544'. Perforated McKee section between 9360-9380', 9400-9430', 9462-9499', 9507-9520', with 4 jet shots per foot. Completed 7-5-50, 2 bbls. per day, non-commercial. On 12-2-50, set Baker cement retainer at 9340', squeezed with 43 sacks Neat cement. Filled csg. with 11.4 mud to 3600'. On 12-3-50 set Baker bridging plug 3610'. Two sacks cement on top of plug to 3602'. On 12-5-50, perforated Queen formation between 3310-3340', 3430-3550', 4 jet shots per foot. On 12-9-50, Hookwall packer at 3410' and treated section between 3430-3550 with 1000 gallons mud acid. On 12-13-50, swabbed dry. On 12-15-50, unseated packer and swabbed both sections dry. Recommend plug and abandon in following manner. Cement section 3602-3275' with 82 sacks cement. Cut off 7" pipe at 3275' and salvage. Cut off 9 5/8" csg at 200'. Fill hole to within 25' of surface with 11# mud. Set 25' plug in 13 3/8" csg. with 4" conventional marker. 9 5/8" csg. from 2900' to 200' to be left in hole. 296' of 13 3/8" csg. to be left in hole.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

This is an old Abo gas well which was originally drilled as the GULF OIL CORPORATION G. G. Travis No. 1 and which was plugged and abandoned by GULF on 27 Jan 66. The well will be reentered and an attempt will be made to tie into the shot off 7" csg at 3624'FS with 7" csg. The 7" csg in the hole will be dressed and washed over and the string will be cemented using a HOWCO "DV" collar. Adequate pressure control equipment will be installed prior to drilling out the plug in the 9-5/8" csg.

* If commercial production is found in the Tubb-Drinkard formation, the well will be completed as a dual McKee/Tubb-Drinkard gasswell.

CHRONOLOGICAL WELL HISTORY

AFE 4

- 11-6-67 FIRST REPORT Cellar dug out.

11-8-67 Moved in rotary tools, prep to spud today.

11-16-67 Drilling at 3515' or rather drilling at 144' on cement with brine in 13 3/8" casing using 8 3/4" HUGHES W-7 bit #1 on 4 3/4" drill collars.

11-17-67 LOWS Rig #25 now milling at 518' on 9 5/8" casing. after 3 attempts with 8 3/4" bit, couldn't get back into casing. COOH put on 8 5/8" long taper mill. Milled from 513-518'.

11-19-67 Lohmann Oil Well Service Rig 25: Went in hole with 8 3/4" bit. Drill plug at 719 - drill plug at 1070' bridge at 995' to 1120'. Run pipe to 1444'. Hit bridge. COOH. Put on 8 3/4 flat bottom mill - 8 4 $\frac{1}{2}$ drill collar. Ran to 600', could not cut through. COOH. Put 8 3/4" long taper mill. Ran to 600', milled to 1444' COOH.

11-20-67 LOWS Rig 25 pull 8 3/4 long taper mill. Ran 6 $\frac{1}{2}$ " concave mill to 2266'. COOH with concave mill. Put on 6 1/8" bit with 8 - 4 $\frac{1}{2}$ d.c. on 2 7/8 drill pipe. Drilled from 2266-2416'. Well blew out. Circulated, ran 14 joints drill pipe. Well blew out again. Put Kelly back on. Lost circulation. Makes 10 sacks Permian seal. Regained circulation. Ran 15 joints drill pipe. Well blew out and lost circulation. Pumped in 70 bbls. brine water, regained circulation. Circulated 20 minutes. Ran 26 joints 2 7/8" drill pipe. Broke circulation. Circulated 10 minutes. Ran 20 joints drill pipe to 4854', broke circulation.

11-21-67 LOWS Rig #25 started out of hole with 6 1/8" bit. Stuck at 4270'. Ran free point with Dialog at 4202'. Ran back off shot at 4205'. Left 2 collars and bit. Pulled 3 jts. pipe. Stuck again. Ran free point at 3979'. Stuck at 3985'. Ran back off shot. Backed off at 3951'. Came out of hole with 74 stand 2 7/8

CHRONOLOGICAL WELL HISTORY

Well Name Travis #1
 Page # 2

drill pipe and one $4\frac{1}{2}$ " drill collar. Made up $8\frac{3}{4}$ " tapered mill. Went in hole with five $4\frac{1}{2}$ " drill collar, and 46 stands of drill pipe to 3020'. Did not tag. Came out of hole. Ran $8\frac{5}{8}$ " skirted shoe 3.58', $8\frac{5}{8}$ " jr. wash pipe 3154', 1 dressing tool 1.26' on five $4\frac{1}{2}$ " drill collars and $2\frac{7}{8}$ " drill pipe.

11-22-67 LOWS Rig #25. Hit scattered bridges with wash pipe. Drilling through. (rig down app. 2 hrs.) Milled over 7" casing with $8\frac{5}{8}$ " shoe and wash pipe at 3609' to 3645'. Circulated 1 hr. COOH with 3 Its. $2\frac{7}{8}$ " drill pipe. Hit right place, put on Kelly and broke circulation. Pumped in 30 BO plus 15 bbl. mud. Pulled 2 stands of drill pipe. Broke circulation.

11-23-67 LOWS Rig #225. Circulated hole. Pulled on $2\frac{7}{8}$ " drill pipe with $8\frac{5}{8}$ " wash pipe. Lost circulation, mixed mud. Pulled on pipe with no movement. Pipe stuck at 1620'. Mixed 26 sacks of gel and 24 sacks of paper and pumped to regain circulation. Regained circulation at 5:30 A.M. Now pulling on pipe.

11-24-67 LOWS Rig #25. Pump down drill pipe trying to regain circ. Mix mud and lost circ. material. Could not get circ. Rig up Dialog to run free point. Run $1\frac{3}{4}$ " free point to 800'. Stuck. Lost free point tool. Standby for sinker bar and jars.

11-18-67 LOWS Rig 225. @ in Red bed at 513' with brine and mud. Vis 42 min. wt. 9.4#/gal $8\frac{5}{8}$ " OD bit No. 1. Worked $8\frac{5}{8}$ " OD mill to 520'. Dumped 1 yard of pea gravel to stabilize csg. COOH with mill and ran $8\frac{3}{4}$ " OD bit, $8\frac{1}{2}$ " drill collars and drilled cement to 719'. (One cement plug from 520-540') Bit plugged and COOH. Cleaned up bit and WIH with $8\frac{3}{4}$ " OD bit No. 1. Found top of csgs. at 580'. COOH and cleaned bit. WIH and mixed mud at depth of 465'. Found top Red bed at 513'. Could not get into $9\frac{5}{8}$ " OD casing. COOH and put on tapered mill. Now going in hole with tapered mill and mixing mud.

11-25-67 Fished Dialog free point indicator out of drill pipe. Pumped into drill pipe and cleared out lost circulation material. Ran Dialog to 1354' at top of wash pipe. Found free point at 1294'. Ran back off shot to 1294' and came out of hole with Dialog. Pulled 38 joints of drill pipe and 3 drill collars, leaving 2 drill collars and 1 jt. of $8\frac{5}{8}$ " OD wash pipe. Ran 2 jts. of $7\frac{3}{8}$ " OD wash pipe on two $4\frac{1}{2}$ " OD drill collars and $2\frac{7}{8}$ " OD drill collars or rather $2\frac{7}{8}$ " OD drill pipe. Washed down from 1245-1294' (top of collars). Washed over two drill collars to top of wash pipe at 1354'. Circulated one hour thru circulating joint above fish. Came out of hole with wash pipe. Ran $3\frac{1}{2}$ " OD circulating sub, $3\frac{1}{2}$ " OD bumper sub, one set of oil jars and four $4\frac{1}{2}$ " OD drill collars and 35 jts. $2\frac{7}{8}$ " OD drill pipe. Screwed into fish at 1294'. Started jarring down on fish at 9:30 P.M. No progress. Started up at 10:30 P.M. Still jarring. Have come up the hole $5\frac{1}{2}$ '.

11-26-67 LOWS rig #25. Unit down 5:30 A.M. until 6:30 P.M. Ran Dialog

- Spudded well 7-27-80. Drilled 1058' of 12-3/4" hole. Set 1057' 8-5/8", 23# surface casing. Cemented w/300 sx HOWCO Lite, 200 sx Class "C". Cement did not circ. Ran 1" pipe to 100', tagged cement. Pulled up to 90' and cemented top w/150 sx. Cement did circulate to surface.
- Tested BOPS and surface casing to 2000 psi for 30 min, pressure held.
- Drilled 7-7/8" hole to 7384'. Had no difficulty except for fluid seeps during drilling.
- Ran one DST 7285-7385', had no shows. Ran Gamma Ray Neutron Density logs.
- Filled hole w/10.0#, 42 Vis, 14cc WL mud and set plugs as instructed by NMOCC.
- Plugs were set as follows:
#1 TD 7384-7284' - 35 sx; #2 Tubb 6415-6315' - 35 sx; #3 Glorieta 4925-4825' - 35 sx; #4 San Andres 3895-3885' - 35 sx; #5 Queen 3405-3305' - 35 sx;
#6 Base of Salt 2345-2245' - 35 sx.
- Base of surface casing 1057-957' - 100 sx. Tagged up 8 hrs, later found top of plug @ 1060'. Put in an additional 54 sx and waited 12 hrs. Ran HOWCO wireline, found top of plug @ 850'.
- Plug at surface - 10sx.
- Erected dry hole marker, filled cellar. Pits are fenced - will be backfilled when they dry out.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.

LEGAL NOTICE	
May 13, 2001	
PUBLIC NOTICE	
MWE 3000 APPLICATION FOR AUTHORIZATION	
TO INJECT SALTWATER	
Arch Petroleum, Inc., P.O. Box 10340, Midland, Texas 79702-7340, (Contract-Richard L. Wright at 915-685-8140) has applied to the New Mexico Oil Conservation Division for Administrative Approval for Authorization to inject saltwater into its C.E. LaMunition No. 079 Well, located 1,700' ENE of "10" ESE of Section 21, T-23-S, R-37-E, N.M.P.M., Lea County, New Mexico. The purpose of such well will be to inject saltwater produced from surrounding area wells. The injection interval will be in the Paddos formations, between 5,098' to 5,228' beneath the surface, with an anticipated maximum injection rate of approximately 1,500 BWPD and an estimated maximum injection pressure of 1,200 psi. Any interested parties must file a written form or request for a hearing with the New Mexico Oil Conservation Division, 1220 South St. Francis, Santa Fe, New Mexico 87505 within fifteen (15) days from the date of this advertisement.
