	Yates	5	42195	P&A App submitted	7-31-02
		1	01460	This Well is believed to be the oldest producing Well in New Mexico. It is being put back on production today. It was actually producing until it was temporarily shut in, but it was not being correctly reported. It will be corrected. Actually I should have said on State Land	

As you can see I am making progress. I still believe it would be a waste of time and money for me to have to go to Sante Fe.

The schedule on the out Months can be shortened considerably.

Thank you, if this is not satisfactory please tell me what else I need to do.
