TO: NOTICE OF THE HEARING OF THE FOLLOWING
NEW MEXICO OIL CONSERVATION DIVISION CASE:

**Re: Application of Burlington Resources Oil & gas LP
BP Amoco and Energen Resources Corp. for an infill
pilot well program for the Pictured Cliffs Formations,
San Juan, Sandoval, Rio Arriba Counties, New Mexico**

On behalf of Burlington Resources Oil & Gas LP, BP Amoco and Energy Resources Corp. please find enclosed a copy of our referenced application which will heard by the New Mexico Oil Conservation Division Examiner on May 2, 2002. The hearing will be held at the Division hearing room located in the Pinon Building, 1220 South St. Francis Drive, Santa Fe, New Mexico, 87502 (phone 505-476-3440).

As an interest owner who may be affected by this application, we are notifying you of your right to appear at the hearing and participate in this case, including the right to present evidence either in support of or in opposition to the application. You are not required to attend this hearing, but failure to appear at the hearing and become a party of record will preclude you from challenging the matter at a later date.

Pursuant to Division Rule 1208.B, you are further notified that if you desire to appear in this case, then you are required to file a Pre-Hearing Statement with the Division not later than 4:00 PM on Friday, April 26, 2002, with a copy delivered to the undersigned. This statement must include: the names of the parties and attorneys; a concise statement of your position in this case; the names of all witnesses you will call to testify at the hearing; the approximate time you will need to present your case and identification of any procedural matters that area to be resolve prior to the hearing.

Very truly yours,

W. Thomas Kellahin

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
DIVISION FOR THE PURPOSE OF
CONSIDERING:**

**APPLICATION OF BURLINGTON RESOURCES
OIL & GAS COMPANY LP, BP AMOCO AND
ENERGEN RESOURCES CORP. FOR APPROVAL
OF A PILOT PROJECT INCLUDING UNORTHODOX
WELL LOCATIONS AND EXCEPTIONS FROM DIVISION
RULE 104.D.3 FOR PURPOSES OF ESTABLISHING
A PILOT PROGRAM IN THE PICTURED CLIFFS
FORMATION TO DETERMINE PROPER WELL DENSITY
REQUIREMENTS FOR PICTURED CLIFFS WELLS IN
SAN JUAN, RIO ARRIBA AND SANDOVAL COUNTIES, NEW MEXICO**

CASE NO. _____

APPLICATION

Comes now Burlington Resources Oil & Gas Company LP ("Burlington"), BP Amoco ("Amoco") and Energen Resources Corp. ("Energen") for approval of a pilot project including unorthodox well locations and an exception from Division Rule 104.D.3 for purposes of establishing a pilot program in the Pictured Cliffs Formation to determine proper well density requirements for Pictured Cliffs wells in San Juan, Sandoval and Rio Arriba Counties, New Mexico. Applicants seek approval for a 30 well pilot program in the Pictured Cliffs formation to gather data to determine the appropriate well density in the Pictured Cliffs formation for wells in pools governed by Division Rule 104.D.3 which currently limits well density to one well per 160 acre gas spacing unit. Applicant further seeks approval for 30 pilot project wells including 4 pilot project wells at unorthodox well locations as indicated on Exhibit "A."

In support of its application, Burlington, Amoco and Energen state:

(1) Burlington is the current operator of the approximately 1,413 active Pictured Cliff wells. Amoco is the current operator of approximately 814 Pictured Cliffs wells, and Energen is the current operator of approximately 514 Pictured Cliff wells in the San Juan Basin of New Mexico.

(2) Burlington, Amoco and Energen want to conduct a pilot project in the Pictured Cliffs Formation to study the feasibility of "infill drilling" for all of the Pictured Cliffs pools currently governed by Division Rule 104.C.3 which provides for 160-acre Pictured Cliffs spacing units and precludes drilling and production of a second gas well within a 160-acre gas spacing unit ("GPU")

(3) The Pictured Cliffs formation/pools displays the following unique characteristics:

- (a) low reservoir pressure
- (b) low sustained producing rates
- (c) high clay content
- (d) shallow depth
- (e) proximity to Fruitland Coal formation

(4) Analysis of existing data suggests that increasing well density to two wells per 160 acre spacing unit would recover addition reserves.

(5) Based upon a study of current geological and reservoir engineering data, Burlington, BP Amoco and Energen have concluded that in order to determine the ultimate recovery of gas from the Pictured Cliffs formation/pools there is a need for a pilot project to study the current well density and ultimate recovery of gas from this formation.

(6) Currently available data is inadequate because:

- (a) The resistivity of the Pictured Cliffs formation is not known and has been accurately measured in the past.
- (b) Current water saturation in the Pictured Cliff are not known.
- (c) Productive potential of the lower Pictured Cliffs formation is not known.
- (d) Electrical rock properties of the lower Pictured Cliffs are not known.

(e) Oil and gas in place (OGIP) is not known with any degree of accuracy.

(7) Accordingly, Burlington, Amoco and Energen desire to initiate a pilot program for the drilling of additional "infill wells" in the Pictured Cliffs formation/pools to obtain data for reservoir engineering and geologic studies for the purposes of determining the proper well density and the ultimate recoverable reserves.

(8) The pilot project is intended to accomplish the following:

- (a) Acquisition of layer pressure measurements
- (b) provide data for reservoir simulation to study:
 - (1) interference between wells
 - (2) evaluate success of re-drill wells
 - (3) evaluate success of re-stimulation programs
- (c) determine formation water saturations
- (d) estimation of original gas-in-place
- (e) estimate of remaining reserves

(9) The initial 30 pilot project wells are to be drilled or recompleted in calendar years 2002 and 2003 and will be located at standard gas well locations except for 4 project wells to be located at unorthodox well locations as indicated in **Exhibit "A" attached.**

(10) The wells are also proposed to be located in an attempt to test the concept of 80-acre well density using the following criteria:

- (a) Pilot wells are located 900 feet or more from an existing Pictured Cliffs well;
- (b) Existing PC wells must be in good producing condition;
- (c) No Basin Fruitland Coal Gas Well in the Section with high production rates or cumulative recoveries;

(d) Existing nearby PC wells cumulative production should be
between 0.7 and 1.5 BCF

(11) Copies of this application have been sent to all operators of any 160-acre spacing unit adjacent to a pilot protect spacing unit and in the absence of a operator to the working interest owners

(12) Approval of this application is in the best interests of conservation, the prevention of waste and the protection of correlative rights.

WHEREFORE Applicant requests that this matter be set for hearing on May 2, 2002 before a duly appointed Examiner of the Oil Conservation Division and that after notice and hearing as required by law, the Division enter its order granting this application.

Respectfully submitted

A handwritten signature in black ink, appearing to read 'W. Thomas Kellahin', written in a cursive style.
