

Case No. 12934: Application of the New Mexico Oil Conservation Division
for Repeal of Rule 402 (Method and Time of Shut-In Pressure Test)

The New Mexico Oil Conservation Division applies to the Oil Conservation Commission to repeal Rule 402, which presently requires all operators of gas wells to conduct annual shut-in pressure tests on each such wells and prescribes the manner of conducting and reporting such tests. Application of the proposed repeal is STATEWIDE.
