Re: Case No. 897 - Application of
M.S.B.W. Company for approval of a
140-acre non-standard gas proration
unit in the Fulcher Kutz-Pictured
Cliffs Gas Pool to be dedicated to
applicant's No. 2 Hargis Well.

Dear Mr. Macey:

The above styled Case No. 897 has been set for hearing on the Commission Docket of May 18, 1955. As offset operator, we request that the following statement be read into the record of Case No. 897:

"Three States Natural Gas Company operates the J. J. Hudson Well No. 1, SE/4 SE/4 Section 33, T-30N, R-12W, which lease directly offsets applicant's No. 2 Hargis well. As offset operator, we request that the Commission deny the application of M.S.B.W. Company for a 140-acre gas proration unit dedicated to their No. 2 Hargis well. Our only objection to the application is the inclusion of 20-acres in NE/4 NW/4 lying southeast of a diagonal line running in a NE-SW direction. Our reasons for this objection are:

1. The 20-acres in the NE/4 NW/4 of Section 33 which applicant seeks to dedicate to its No. 2 Hargis well is nearer to and more likely to be drained by applicant's Montano Well No. 1. Since applicant seeks to include the NW 20 acres of the NE/4 NW/4 in a non-standard gas proration unit for its Montano Well No. 1, reference Case No. 896, they have, by inference, agreed that the formation is continuously permeable between the two wells, and either well is capable of draining the area. Therefore, it would seem more logical and equitable to dedicate the entire NE/4 NW/4 to the nearest well, applicant's Montano Well No. 1.

Mr. W. B. Macey

May 11, 1955

-2-

2. Many other operators in the Fulcher-Kutz Pictured Cliffs field have formed non-standard gas proration units following the established precedent of dedicating acreage in increments of 40-acre governmental subdivisions when dedication by diagonal, hexagonal, or other irregular division might have been to their benefit. This precedent, and the equities already established thereunder should not be changed.

For the reasons set out above, Three States Natural Gas Company recommends that the New Mexico Oil Conservation Commission deny the application of the M.S.B.W. Company for a 140-acre non-standard gas proration unit to be dedicated to their No. 2 Hargis Well."

Yours very truly,

THREE STATES NATURAL GAS COMPANY

A handwritten signature in dark ink, appearing to read "E. A. Jenkins", is written over the typed name. The signature is fluid and cursive, with a large loop at the end of the last name.
