Operators Will Set Casing And Cement Oil Test

Magdalena lime has been encountered in the Clary-Ruther State No. 1 oil test now being drilled five miles southeast of Las Cruces at 583 feet, it has been announced. The bit has gone into the formation after water was encountered at 554 feet.

The hole filled rapidly up to 200 feet with the water before it was walled off with the setting of 12 1/2-inch casing. Plans now call for continuing of 10-inch casing beyond this depth and this casing is being moved into the rig. The well is to be cemented and drilling operations will then be continued.

It was stated that so far showings had been encountered of the Magdalena lime and shale. The formations were expected including were encountered in keeping a geological report on the

The test is being drilled by W. L. Clary and L. B. Ruther in section 36, township 23 and range 2E. Clary and Ruther held approximately 102 sections in leases at the time they started drilling the first test. Plans also have been made, they announced, for two more tests to be drilled.

It is also possible that if production is not encountered before 3,000 feet the test may be drilled deeper. Announcement along the line was made. The contract now calls for 3,000
