APPLICATION FOR HEARING REGARDING COMMUNITIZATION OF LEASES ON  
A NORTH-SOUTH BASIS ON THE WEST TIER OF SECTIONS, TOWNSHIPS 30  
NORTH, 9 WEST AND 31 NORTH, 9 WEST

Mr. R. R. Spurrier  
State Oil Conservation Commission  
State of New Mexico  
Santa Fe, New Mexico

Dear Mr. Spurrier:

Application is hereby made to the State Oil Conservation Commission to have permission granted to communitize the short sections on a North-South basis on the West side of Townships 30 North, 9 West, and 31 North, 9 West. This application is being made to prevent waste and unnecessary drainage, and to give the operators who own the acreage on the West side of the above named townships a full drilling unit of 320 acres in order to obtain full allowables for wells located in this area.

If at all possible, we would like to have this hearing set up for October 11, 1950. Please let me hear from you at your earliest convenience.

Yours very truly,

DELHI OIL CORPORATION

October 18, 1950

Mr. R. R. Spurrier, Secretary  
State of New Mexico  
Oil Conservation Commission  
Santa Fe, New Mexico

Dear Mr. Spurrier:

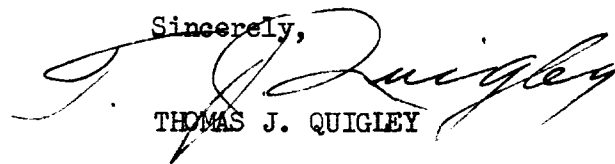

In the matter of the application of Delhi Oil Corporation (Case 236), the writer begs to suggest that their application be approved.

The writer and one of his associates are the owners of a short quarter section in Township 30 North, Range 9 West, which was purchased in good faith with the idea that it was a full quarter. Only when title came down was it learned that it was a short quarter.

It is obvious that this would work a hardship on an owner of the property, and it is for that reason that we are supporting the application of Delhi.

Thanking you for your attention and with best wishes, I am

Sincerely,

  
THOMAS J. QUIGLEY

Dear Mr. Spurrier:

I wish to thank you for your favor of November 7th regarding Delhi's application, Case #236, together with your plat which describes the matter so lucidly. I hope you will pardon me if I tell you that I cannot agree that it seems like a good plan.

If you would take time to outline the wells as they would fall under the program, I think you will agree with me that the pattern in those sections would be completely out of balance, and that it would likewise interfere with the pattern in the next sections to the west. I cannot see where any injustice would be done anyone if the N $\frac{1}{2}$  of each of these sections would be constituted a drilling unit, and the S $\frac{1}{2}$  of each of these sections would likewise be constituted a drilling unit.

It is true that this would create drilling units of only 260 acres, instead of 300 acres which you propose, but it would harm no one, and keep the drilling pattern in the area intact. Otherwise some of these wells drilled as you propose on the W $\frac{1}{2}$  of these sections would be jammed up against these other wells both east and west.

Inasmuch as Delhi wrote me that they were asking for a program such as I have just outlined, I would greatly appreciate your reconsidering this matter, as I think it would be best for all concerned.

Thanking you for your courtesy and with best wishes, I am

Yours very truly,

  
THOMAS J. QUIGLEY

Dear Mr. Quigley:

In reply to your letter of November 6, in which you refer to Delhi's application, Case 236, we have not yet issued an order on this case, but the following was approved on the day of the hearing:

All of the extreme west quarter sections of townships 30 and 31 north, Range 9 west, will be communitized by 3's to form four drilling units of about 300 acres each. Enclosed please find a township plat upon which I have attempted to show in red pencil, what I mean.

The east half of each section on the west side of these two townships will necessarily become a drilling block.

Very truly yours,

In re: Case 236 - Delhi  
Application.

Gentlemen:

Some time ago I was advised that the hearing was to be held on October 24th relating to the above case, and understood that the application was for an order permitting the communitizing of short or narrow quarter sections on the north - south basis as they lie along the west side of Townships 30 and 31 North, Range 9 West, etc.

Inasmuch as I am the owner of the NW $\frac{1}{4}$  of Section 6 - 30 North - 9 West, I was naturally interested in this matter. My quarter section comprises only approximately 100 acres. I also received a letter from Delhi Oil Corporation advising me that they intended to drill the N $\frac{1}{2}$  of Section 6 making a unit out of that, and also the S $\frac{1}{2}$  of Section 6 making a unit out of that. In other words, there would be 260 acres in each drill block, and they suggested that I pay my proportionate share of the well which they were to drill in the NE $\frac{1}{4}$  of Section 6, and receive my proper proportion of the proceeds. I wrote them two or three times regarding this, and have never had a comprehensive reply. They have gone ahead and are drilling a gas well on the NE $\frac{1}{4}$ .

Now to my amazement I have been told that at your meeting on October 24, 1950 that instead of making the N $\frac{1}{2}$  of each section and the S $\frac{1}{2}$  of each section separate and distinct drill blocks, there has been some new proposal whereby the E $\frac{1}{2}$  of the section would become a drill block, and in some way which I do not understand the acreage on the west line would be made into some sort of drill blocks, which it seems to me would entirely upset the drilling pattern in the entire area and generally would make a mess of things. I am, therefore, very anxious to hear from you at once as to what the situation actually is, as I understand that you have not yet given a final decision in the matter.

Thanking you for an early reply, and with my very best wishes,  
I am

Yours sincerely,

*T. J. Quigley*
