Figure 1 shows a 3D schematic diagram of a three-layered structure. The top layer is labeled 'Top layer' and contains a 'Top layer' label. The middle layer is labeled 'Middle layer' and contains a 'Middle layer' label. The bottom layer is labeled 'Bottom layer' and contains a 'Bottom layer' label. The layers are separated by horizontal lines. The top layer is the thickest, followed by the middle layer, and the bottom layer is the thinnest. The layers are labeled with 'Top layer', 'Middle layer', and 'Bottom layer' respectively.

having first been duly sworn, testified as follows:

DIRECT EXAMINATION

By MR. WHITE:

Q. Will you state your name, please. Last name first, please?

A. Stanley John Stanley.

Q. What is your position, please?

A. Oil and gas engineer for the Oil Conservation Commission.

Q. As oil and gas engineer, have you had occasion to make a study of the proposed creations and extensions of pools as advertised in Case 531?

A. I have.

Q. Will you give your report of that study?

A. I recommend that all extensions and deletions be made as advertised with the exception of paragraph (d) in Case 531. In addition to the advertised extensions, it is recommended that the pool be extended to incorporate the west half of Section 26, Township 13 South, Range 33 East and thereby include the Texas Company, State of New Mexico, BV-No. 1, Unit E in Section 26, Township 13 South, Range 33 East.

Q. If there are going to be more lands involved than those advertised, I think we should readvertise.

MR. SPURRIER: Is there objection to - - -

VOICE: I think that's covered by the present advertising.

MR. SPURRIER: Is there any objection to Mr. Stanley's recommendation? Are there any comments or any questions of the witness?

VOICE: Mr. Stanley, do you happen to have the type of depth in these fields?

A. Yes, sir. I do.

VOICE: Would you read them, please?

A. All right. In the East Caprock Wellcamp - -

VOICE: Is that sub-paragraph (c)?

A. Sub-paragraph (c). Top of the perforation in sub-paragraph (d) is 9,660.

MR. GRAHAM: What's the dope on that Texas well?

A. Well, that well - they requested an extension after we had advertised the case and we have studied the well from a geological standpoint and believe it lies in the same pool and therefore we wish to extend it in that direction to incorporate that well for that pool and not create another advertising.

In the creation of the East Caprock Wolfcamp field, top perforation, 8,600. In the creation of the West Livingston-Pennsylvanian field, top of the perforation, 11,430. I believe that's all the creations we have.

MR. SPURRIER: If there are no further questions of this witness, the meeting is adjourned.
