Rule 312, Subsection (c) of the Rules and Regulations of the Oil Conservation Commission be amended as follows:

None of the provisions of Paragraph (a) and (b) of this Rule are applicable to the recovery of wash-in oil, creek oil, pit oil, or scrubber oil where such oil is picked up and returned to the lease on which produced or where such oil is disposed of by the owner to an authorized purchaser or transporter and accounted for on Commission Form C-110. Provided, however, before any person other than the owner shall pick up, reclaim, salvage or transport wash-in oil, creek oil, pit oil, or scrubber oil, a permit to do so shall be obtained from the owner or operator of the lease, pipe line, or refinery and a permit from the duly authorized agent of the Commission. A purchaser or transporter desiring to obtain a permit to perform the services under Subsection (c) of this Rule shall:

- 1. File with the Commission a surety bond of performance satisfactory to the Commission, payable to the Commission of the State of New Mexico in the penal amount of \$25,000.00.
- 2. A written application for a permit to transport shall be filed and a public hearing had thereon. All applications to show:
 - (a) The name and location of the lease, trap or pit;
 - (b) The number of well or wells from which the oil or drip was produced or the source of such oil or drip;
 - (c) The name of the owner, operator or manager of the lease, pipe line or refinery;
 - (d) Contracts of purchase, if any.

- 3. All permitees will be required to establish permanent storage facilities in the area called for in the permit and give the location thereof, such facilities to serve the area covered by the permit.
- 4. All permitees will be required to furnish the following evidence, to-wit:
 - (a) Run Tickets showing acquisition;
 - (b) Accumulation reports showing storage;
 - (c) C-110;
 - (d) Monthly reports.*

After the granting of a permit in the event the permitee is found guilty of violation of any of the Rules and Regulations of the Oil Conservation Commission or any of the laws of the State of New Mexico in regard to the production, sale and transportation of oil or drip gasoline, said permit shall be subject to cancellation without hearing. The Commission may suspend any permitee upon presentation of evidence of violation of the Rules and Regulations of the Commission; provided, however, that such suspension shall be temporary until the charges against the permitee are made known to the permitee and the hearing before the Commission must be granted the permitee within twenty days after the notification of the charges made, and should the Commission determine that the charges are well founded, the Commission may then enter its order cancelling the permit.

^{*}Suggested forms of the four reports attached.

December 15, 1954

Mr. W. B. Macey, Secretary-Director New Mexico Oil Conservation Commission P. O. Box 871 Santa Fe, New Mexico

Dear Bill:

First, let me congratulate you and possibly offer commiserations on your new job. In my opinion, your State is very fortunate in being able to replace a very good man with another very good man.

I am belatedly replying to your letter of November 26, 1954 in which you ask for an outline of procedure which the Commission follows with regard to movement of drip gasoline.

I am enclosing a copy of our Form GP-1, which is a gas processing plant monthly report and tender operations statement and I have shown by type of plant that this is "drip". Then down in Section VI I have checked the items which are usually filled in and in nearly all cases the liquid is crude oil or condensate; however, should it be another product, you will note other columns for gasoline, kerosene, etc. After this report is filed, the drip pay then be tendered to the refinery on either a Commission Form SW-3, which is a crude oil tender, or on Commission Form SW-4, which is a production tender, depending on the nature of the liquid. Copies of these forms are also attached.

We find that without adopting a new form for the small amount of drip collected over the State, that it was easier and so far has served our purpose by proceeding in the manner stated above.

Norman Woodruff with El Paso Natural Gas called me about this matter while he was in Santa Fe and I attempted to explain this over the phone and asked that he convey this information to you. If there is anything further you would like to know, please advise and if I can help you in any way, don't fail to call.

The best possible luck to you in your work.

Yours very truly,

Arthur H. Barbeck Chief Engineer

arthur V. Barbert

- This report shall be filed in four (4) duplicate originals with the Deputy Supervisor of the Railroad Commission of Texas for the District in which the Plant is located as soon after the first of the Month as possible for the preceding Month, and never later than the Twenty-Fifth of the month.
- This report is required of all Plants extracting Hydrocarbon Liquids from Natural Gas. All Gas Volumes must be reported at a Base Pressure of 14.65 pounds per square inch absolute and a Base Temperature of 60 degrees fabrenheit. All liquid quantities shown on this report shall be in barrels of 42 U.S. Gallons based on actual physical guages computed from 100% U.S. Tank Tables or other method of measurement approved by the Commission and corrected from the temperature at the time of measurement to a standard temperature of 60 degrees fabrenheit. Do not use fractions of thousands of cubic feet of gas, or fractions of barrels of liquid on this report.
- The Address as required on this report shall be clear and definite as to Street Number, City and State.
- In Section I show total volume of gas into Gathering System: Deliveries from Gathering System (including Venting); the remaining volume to plant for processing; the actual plant Intake; the Loss or Gain in volume which is the difference between Lines 4 and 5; Net Gas to plant for processing is Total of Lines 5, 7 and 8.
- In Section II show the disposition of deliveries from the Gathering System.
- In Section III "Disposition of Residue" show as follows: Fuel & Lease Gas used by yourself, sold, or given to others for use in Field Operations, or for use in Lease Dwellings and other Dowestic uses; Gas Lift Gas used, sold, or given for injection into Oil Wells to Lift Oil; Repressuring and Pressure Maintenance Gas used, sold, or given to maintain or build up Reservoir Pressure through an Injection Well; Cycling Gas returned to original nonassociated Gas Reservoirs after extraction of Liquid Hydrocarbons; Carbon Black Gas used, sold, or given for the manufacture of Carbon Black; Transmission Line Gas Lines, operated by Natural Gas Companies (Public Utilities).
- In Section VII report the Volumes of Gas which are returned to Reservoirs in Pressure Maintenance, Repressuring, or Cycling operations. Show the Volume for each Well. If more space is needed use Form GP-3.

INSTRUCTIONS

No person shall ship or cause to be shipped any product from any oil field or from any refinery, topping plant, blending plant, gasoline plant, or other plant at which a product is manufactured or processed situated within the State of Texas unless and until such person has obtained a permit covering such shipment issued in conformity with the provisions of this order.

No person shall receive any product for transportation or transport any product from any oil field or from any refinery, topping plant, blending plant, gasoline plant, or other plant at which a product is manufactured or processed situated within the State of Texas unless and until such person has been furnished a permit covering such shipment issued in conformity with the provisions of this order.

A permit may be issued where the destination or consignee of products covered by the permit is unknown at the time of application, but no permit may be issued which names more than one initial transporting agency. A permit may be issued to cover more than one delivery, or to cover deliveries on a forecast to meet requirements of the shipper. In the event a permit is issued to cover future deliveries on a forecast of a shipper the Commission shall indicate on such permit the date same shall expire, (such date of expiration shall be not later than the end of the calendar month during which the shipments are authorized), and it shall not be necessary for an approved copy of the permit to accompany each shipment, provided, however, that the transporter carrying by railroad or pipe line the product described in the permit has received an approved copy of the permit before accepting any of such product for transportation, and provided a transporter by boat or barge carrying the products described in a tender must receive an approved copy of a tender or a shipping paper bearing the date and scrial number of the tender before accepting such product for transportation. A transporter by truck or motor vehicle shall comply with the provisions of Section five (V) of this order. A forecast tender to cover shipments to be made during all or part of a calendar month may be obtained not earlier than the 20th day of the next preceeding month. If loading a vessel is begun during a calendar month and completed during the next calendar month, the shipper may treat the entire cargo as having been shipped during the calendar month in which loading commenced.

The shipper of products shall file in the office of the Commission located in the district from which such products are to be shipped four (4) duplicate original copies executed by the shipper or his duly authorized agent of his application on report Form SW-4. Each application for permit must be on file with the Commission twelve (12) hours before the same shall be considered except in cases of emergency. Two copies of the report filed by the shipper, if approved, shall be retained by the Commission and two copies returned to the maker of the report, such shipper retaining one copy and delivering one copy to the transporting agency authorized to transport such product. Before such permit shall be issued by the Commission, the shipper is required to show in his application on Form SW-4 the information required to be reported on said form.

If the product tendered is casinghead or natural gas gasoline, the applicant must state the name and location of the plant where such gasoline was produced, the names and location of the leases from which the casinghead gas supplying said plant was obtained and the names of the operators of said leases.

INSTRUCTIONS: Form SW-3 is to be used for any transfer of possession or control within or from the State of Texas of oil imported and/or law-fully produced in said State. The consignor shall be required to execute under oath four duplicate originals of the report on Form SW-3 and to file the same in the office of the Railroad Commission of Texas designated to receive such reports. The Commission's Agent, in such office, shall examine the same and place on each copy of said report on Form SW-3, the Commission's serial number and date of such registration and place thereon signature of approval or disapproval. The Commission shall retain two copies of report on Form SW-3 and return two copies thereof to the shipper, one of which copies the shipper shall deliver to the transporter. In the event a Tender on Form SW-3 is registered with the Commission to cover future deliveries on a forecast the Commission through its duly authorized agent shall indicate on such Tender the time when same shall expire and it shall not a registered copy of the Tender to accompany each shipment; provided the transporter carrying the oil described in the Tender has received a registered copy of the Tender before accepting such oil for transportation. The first person receiving oil for transportation shall, if it is not a pipe line, stamp on

the shipper papers the following: "This shipment is covered by Tender No....., registered with the Railroad Commission of Texas on the......da

PERMIT AGREEMENT

THIS PERMIT AGREEMENT, made and entered into as of the 247 day of 1954, by any between PERMIAN BASIN PIPELINE COMPANY, accelerate corporation, hereinafter called "Permian" and JOSEPH S. NEWMAN of 1308 Yucca Drive, Hobbs, New Nexico, hereinafter called "Newman,"

WITHESSETH:

MHENEAS, Permian is the owner of natural gas gathering pipelines situated and operated, in part, in Lea County, New Mexico, and

whichEAS, in the operation of said pipelines it becomes necessary to connect drips thereto for the purpose of accumulating condensate which separates in liquid form from the natural gas transmitted through said lines, which condensate must be discharged from said drips at frequent intervals, and

MHEREAS, a variable proportion of said condensate is what is commonly known as "orip gasoline," and

WHEREAS, Newman desires to collect said condensate from said drips and to dispose of same as his own property;

NOW THEREFORE, Permian and Newmon agree as follows:

- 1. That subject to the terms, provisions and conditions hereinafter set forth Newman is hereby permitted to and shall collect said condensate from said drips as often as shall be necessary in order to prevent the overflow of such drips and the consequent restriction of gas from in the pipelines and shall dispose of such condensate as his own property, and for that purpose Permian hereby consents to access and ingress to said drips and egress from the same by Neuman.
- 2. That attached hereto, and by this reference made a part hereof, is Exhibit "" which exhibit indicates these interpretation which Neuman is to contect condensate.
- 3. That Permian shall not in any manner be liable or responsible to Newman in the event the collection of said condensate, or access, ingress or agress of Newman to or from said drips is in any manner intorrupted, delayed, interrupted with or prevented by persons other than one loyees of Permian.
- 4. That Newman shall have the full responsibility for gathering, storing, using, selling or dealing in any manner whatsoever with said condensate, and Permian shall be relieved of all liability of whatsoever nature resulting from the using, handling, storing, selling and gathering of said condensate, and Newman shall be solely responsible for the same and shall indemnify, save and hold harmless Permian from and against any and all claims for demaged to persons or property, including all such claims of the owners, tenants or occupants of the land upon which said drips are located which may unlike out of the operations of Newman, his employees and agents hereunder.
- 5. That in collecting said condensate neither Newman nor his agents or employees shall become an agent, employee or representative of Permian nor shall they perform any services for or under the direction or control of Permian, but, with respect to this permit and agreement, shall be as an independent contractor with a permit to collect said condensate from Permian's drips and dispose thereof.

rise as unto and Types of residue which as stoles and the sampers to in the concerns, as any short substitute Peril to the same concerns, as any short substitute Peril to the same free collected from each of astronomy. Bestitute should have an eight or any since to have access to the records which Newman keeps under the terms hereof and short a iso have the right to send a representative to accompany Newman or his applicated at any time when said residue is being collected.

7. Nominan shall secure such pormits, approvals or certificates as may be required by any state or federal regulatory authorities in connection with the collection, use and ownership of said drip gasuline by Newman, and Newman hereby relieves Permian from the payment of any fees, taxes or costs as are or may be imposed or ascertained by any of such authorities on the collection, use or ownership of said condensate.

ILLEGIBLE

- 6. That the parties hereto understand that the aumerahly of said condensate as is tuben from the drips specified in Exhibit "A" shall be vested in Neuman, and Fermion shall have no right, title or claim thereto excepting such right of disposal as is given Permion in paragraph 12, hereof.
- 9. This Permit Agreement shall be in force and effect for a period ending one (1) year from the date of the execution of same; provided, however, that either party hereto may terminate this agreement before such expiration date by giving the other party six (6) months' written notice of such intention to terminate.
- IC. In the event that the United States Government or the State of New Mexico or any political subdivision of either shall pass legislation or premulgate regulations prohibiting the taking of said condensate as set out in this Permit Agreement, then, and in that event, this Permit Agreement shall be null and void and not be binding on either party.
- il. Newmon shall maintain such insurance as will afford protection from any claims that may arise under any workmen's compensation law for injuries to employees of Newman, and Norman shall maintain such other insurance as will protect the parties hereto from any claims for damages for personal injury or damage to property which may arise from the operations of Newman or any of his employees or agents under the terms of this Permit Agreement. Evidence of such insurance in such form as Permian may require shall be delivered to Permian and such insurance shall be subject to the approval of Permian for adequacy of protection and shell afford the following minimum coverage:

A.	Workmon's Compensation	Statutory	
8.	General Public Bodily Injury Liability	\$50,000 each person \$100,000 each accident	
c.	General Public Property Damage	\$25,000 each accident	
٥.	Automobiles and Trucks:	•	
	Public Bodily Injury Liability	\$50,000 each person \$100,000 each accident	
	Public Property Damage	\$50,000 each accident	

trrespective of the insurance to be carried by Hemman, the insolvency, benkruptcy or failure of any insurance company carrying insurance of Neuman, or the failure of any insurance company to pay any claim accruing shall not be held to waive any of the provisions of this Permit Agreement.

- 12. Permian reserves the right to empty said drips and dispose of the contents thereof without notice, responsibility or liability to Newman when and if it is found that Norman has not collected said condensate and if, in the sole judgment of Permian, such is necessary or desirable for the proper operation of its pipelines.
- 13. This Parmi'r Agreement shall not be assignable by either party without the written consent of the other.
- Agreement with the full knowledge and unleastanding of the dangers involved in the draining of said drips and the collection of condensate therefrom, and Neuman assumes all responsibility for himself, his employees and agents and their safety when collecting said condensate under the terms of this Pormit Agreement.

Executed as of the day and year first above written.

Mr. Randall Montgomery, Oil Conservation Commission, Hobbs, New Mexico.

Dear Sir:

100 m

It is my suggestion that in addition to the proposed findings in Case No. 779, the Commission make the following additional findings:

"That the gas transporter file with the Commission map or maps showing all gathering and main trunk pipe line systems identifying all drips located upon said lines."

"That the gas transporter file within one hundred twenty days (120) from the effective date of this Order a Report showing the disposition of all condensate trapped in all drips."

"That the gas transporter furnish to the Commission for its approval all contracts covering the servicing and disposal of accumulations from the drips."

"That all purchasers of drips be required to report volumes acquired by drip."

I further suggest that the order part of the proposed Order be revised as follows: that sub (c) be changed to include sub (f)(g)(h). That sub-paragraph (f) be added:

- (f) That the gas transporter shall file within one hundred twenty (120) days after the effective date of this Order a plat showing all gathering lines and main transmission lines and locating thereon all drips used in connection therewith.
- (g) That all contracts for the sale of drip fluids or for the gathering thereof be furnished to the Commission for approval.

Mr. Randall Montgomery, Page -2-, May 11, 1957.

(h) That the purchaser of all drip fluids file a monthly report reporting the amount of fluids recovered by drip. Provided that should the drips not be serviced, the gas transporter report to the Commission the disposition of all drip products by drip.

Very truly yours,

W. D. GIRAND.

OIL CONSERVATION COMMISSION

P. O. BOX 871

SANTA FE, NEW MEXICO

November 26, 1954

Mr. Arthur Barbeck Railroad Commission of Texas Oil and Gas Division Tribune Building AUSTIN, TEXAS

Dear Sir:

This Commission has recently been confronted with the problem of prescribing rules and regulations pertaining to the movement of drip gasoline. This case, which has been continued twice, is important to us because it involves considerable volume of "drip."

We do not want to impose regulations which are impossible or difficult to enforce, but at the same time feel that some effective control should be maintained over this product.

I would appreciate it very much if you would furnish me with an outline of the procedure which your Commission follows in authorizing the movement of drip gasoline from the time it is collected in "dripe" until it is moved ultimately to the refiner. Copies of any forms which you require in connections with this matter will also be very helpful.

with best personal regards,

Sincerely,

W. B. Macey Secretary-Director

WBM:nr

RULE	

- A. Before any liquid hydrocarbons may be recovered from drips or other collecting devices on natural gas gathering and transmission lines by a party other than the owner of the pipeline facilities from which it is to be recovered, the following regulations must be complied with:
 - 1. The party desiring to recover such liquid hydrocarbons must obtain from the New Mexico Oil Conservation Commission a permit to gather gas pipeline drip products. Such a permit shall be granted only after said party has proved to the Commission's satisfaction (1) that there is a need for such a permit and (2) that the operation will be conducted satisfactorily.
 - 2. Application for the permit discussed in 1 above must be accompanied by four copies of Form 110 executed by the owner of the gas pipeline facilities authorizing the gathering and transporting of such drip products and giving a description of the facilities which are authorized to be serviced.
 - 3. The gatherer and transporter authorized as provided above shall file Form 112 each calendar month in accordance with Rule 1111.
- B. Any liquid hydrocarbons which have been recovered from drips or other collecting devices on natural gas gathering and transmission lines by the owner of said pipeline facilities may be transported by a party other than such owner if the following regulations are complied with:
 - 1. The owner of the gas pipeline facilities shall execute in quadruplicate and file with the Commission Form C-110 authorizing the transportation and describing the facilities to be serviced.
 - 2. The owner of the gas pipeline facilities shall file with the Commission a monthly report on Form C-112 indicating therein stocks of liquid hydrocarbons on hand and deliveries to each transporter for the month.
 - 3. The authorized transporter shall file with the Commission a monthly report on Form C-112 indicating therein receipts from each storer and deliveries to storers or refiners for the month.
- C. An owner of natural gas gathering and transmission lines who gathers and transports liquid hydrocarbons recovered from drips or other collecting devices on said lines shall file with the Commission a monthly report on Form C-112 indicating therein stocks of liquid hydrocarbons on hand and deliveries to storers or refiners for the month.

RU	LE

- A. Before any liquid hydrocarbons may be recovered from drips or other collecting devices on natural gas gathering and transmission lines by a party other than the owner of the pipeline facilities from which it is to be recovered, the following regulations must be complied with:
 - 1. The party desiring to recover such liquid hydrocarbons must obtain from the New Mexico Oil Conservation Commission a permit to gather gas pipeline drip products. Such a permit shall be granted only after said party has proved to the Commission's satisfaction (1) that there is a need for such a permit and (2) that the operation will be conducted satisfactorily.
 - 2. Application for the permit discussed in 1 above must be accompanied by four copies of Form 110 executed by the owner of the gas pipeline facilities authorizing the gathering and transporting of such drip products and giving a description of the facilities which are authorized to be serviced.
 - 3. The gatherer and transporter authorized as provided above shall file Form 112 each calendar month in accordance with Rule 1111.
- B. Any liquid hydrocarbons which have been recovered from drips or other collecting devices on natural gas gathering and transmission lines by the owner of said pipeline facilities may be transported by a party other than such owner if the following regulations are complied with:
 - 1. The owner of the gas pipeline facilities shall execute in quadruplicate and file with the Commission Form C-110 authorizing the transportation and describing the facilities to be serviced.
 - 2. The owner of the gas pipeline facilities shall file with the Commission a monthly report on Form C-112 indicating therein stocks of liquid hydrocarbons on hand and deliveries to each transporter for the month.
 - 3. The authorized transporter shall file with the Commission a monthly report on Form C-112 indicating therein receipts from each storer and deliveries to storers or refiners for the month.
- C. An owner of natural gas gathering and transmission lines who gathers and transports liquid hydrocarbons recovered from drips or other collecting devices on said lines shall file with the Commission a monthly report on Form C-112 indicating therein stocks of liquid hydrocarbons on hand and deliveries to storers or refiners for the month.

RECOMMENDED RULE BY EL PASO NATURAL GAS COMPANY

RU	LE	

GATHERING AND TRANSPORTING OF LIQUID HYDROCARBONS RECOVERED IN DRIPS OR OTHER COLLECTING DEVICES WHICH ARE A PART OF NATURAL GAS GATHERING AND TRANSMISSION LINES

- A. Before any liquid hydrocarbons may be recovered from drips or other collecting devices on natural gas gathering and transmission lines by a party other than the owner of the pipeline facilities from which it is to be recovered, the following regulations must be complied with:
 - 1. The party desiring to recover such liquid hydrocarbons must obtain from the New Mexico Oil Conservation Commission a permit to gather gas pipeline drip products. Such a permit shall be granted only after said party has proved to the Commission's satisfaction (1) that there is a need for such a permit and (2) that the operation will be conducted satisfactorily.
 - 2. Application for the permit discussed in 1 above must be accompanied by four copies of Form 110 executed by the owner of the gas pipeline facilities authorizing the gathering and transporting of such drip products and giving a description of the facilities which are authorized to be serviced.
 - 3. The gatherer and transporter authorized as provided above shall file Form 112 each calendar month in accordance with Rule 1111.
- B. Any liquid hydrocarbons which have been recovered from drips or other collecting devices on natural gas gathering and transmission lines by the owner of said pipeline facilities may be transported by a party other than such owner if the following regulations are complied with:
 - 1. The owner of the gas pipeline facilities shall execute in quadruplicate and file with the Commission Form C-110 authorizing the transportation and describing the facilities to be serviced.
 - 2. The owner of the gas pipeline facilities shall file with the Commission a monthly report on Form C-112 indicating therein stocks of liquid hydrocarbons on hand and deliveries to each transporter for the month.
 - 3. The authorized transporter shall file with the Commission a monthly report on Form C-112 indicating therein receipts from each storer and deliveries to storers or refiners for the month.
- C. An owner of natural gas gathering and transmission lines who gathers and transports liquid hydrocarbons recovered from drips or other collecting devices on said lines shall file with the Commission a monthly report on Form C-112 indicating therein stocks of liquid hydrocarbons on hand and deliveries to storers or refiners for the month.

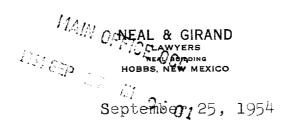

RECOMMENDED RULE BY EL PASO NATURAL GAS COMPANY

RULE

GATHERING AND TRANSPORTING OF LIQUID HYDROCARBONS RECOVERED IN DRIPS OR OTHER COLLECTING DEVICES WHICH ARE A PART OF NATURAL GAS GATHERING AND TRANSMISSION LINES

- A. Before any liquid hydrocarbons may be recovered from drips or other collecting devices on natural gas gathering and transmission lines by a party other than the owner of the pipeline facilities from which it is to be recovered, the following regulations must be complied with:
 - 1. The party desiring to recover such liquid hydrocarbons must obtain from the New Mexico Oil Conservation Commission a permit to gather gas pipeline drip products. Such a permit shall be granted only after said party has proved to the Commission's satisfaction (1) that there is a need for such a permit and (2) that the operation will be conducted satisfactorily.
 - 2. Application for the permit discussed in 1 above must be accompanied by four copies of Form 110 executed by the owner of the gas pipeline facilities authorizing the gathering and transporting of such drip products and giving a description of the facilities which are authorized to be serviced.
 - 3. The gatherer and transporter authorized as provided above shall file Form 112 each calendar month in accordance with Rule 1111.
- B. Any liquid hydrocarbons which have been recovered from drips or other collecting devices on natural gas gathering and transmission lines by the owner of said pipeline facilities may be transported by a party other than such owner if the following regulations are complied with:
 - 1. The owner of the gas pipeline facilities shall execute in quadruplicate and file with the Commission Form C-110 authorizing the transportation and describing the facilities to be serviced.
 - 2. The owner of the gas pipeline facilities shall file with the Commission a monthly report on Form C-112 indicating therein stocks of liquid hydrocarbons on hand and deliveries to each transporter for the month.
 - 3. The authorized transporter shall file with the Commission a monthly report on Form C-112 indicating therein receipts from each storer and deliveries to storers or refiners for the month.
- C. An owner of natural gas gathering and transmission lines who gathers and transports liquid hydrocarbons recovered from drips or other collecting devices on said lines shall file with the Commission a monthly report on Form C-112 indicating therein stocks of liquid hydrocarbons on hand and deliveries to storers or refiners for the month.

W. D. GIRAND, JR.
KERMIT E. NASH
W. D. GIRAND, SR.
J. W. NEAL

Oil Conservation Commission, Santa Fe, New Mexico.

Attention: Mr. W. B. Macey.

Dear Mr. Macey:

Some time ago I discussed with you the preparation of a notice for the Commission to consider the adoption of rules and regulations covering acquisition, transportation and sale of drip gasoline and trap oil. I am enclosing herewith a suggested notice which I feel will cover all phases of the hearing and between now and the 15th of October I will furnish you with a proposed set of rules and regulations covering this item.

Very truly yours,

NEAL & GIRAND.

G/ls Encl.

PROPOSED NOTICE

CASE NO.
APPLICATION OF THE COMMISSION UPON ITS OWN MOTION TO
REVISE RULE 312 TO PROMULGATE SUPPLEMENTARY AND ADDITIONAL RULES AND REGULATIONS GOVERNING THE ACQUISITION, TRANSPORTATION AND SALE OF DRIP GASOLINE AND TRAP OIL.

PROPOSED RULE REVISIONS IN CASE 791

The following memorandum reflects informally the changes in rules recommended by the Oil Conservation Commission staff in Case 791, as advertised for the November 17, 1954, regular hearing.

502 II

No unit shall produce during any one proration period more than the allowable production of such unit for the proration period plus a tolerance of not to exceed 5 days allowable production. This permissive tolerance of overproduction from a unit shall be adjusted or balanced by subsequent corresponding underproduction from the same unit. Overproduction within the permitted tolerance shall be considered as oil produced against the allowable production assigned to the unit for the proration period during which such overproduction is adjusted or balanced by underproduction.

(The present rule requires that any overproduction must be adjusted during the month following the month in which it occurs. The proposed revision retains the limit of 5 days tolerance but does not prescribe a specific time for adjustment. It provides in effect a running cushion of 5 days tolerance which is more in keeping with practical operating practices.)

503 (a**)**

The Commission shall meet between the 13th and 20th of each month at open hearing for the purpose of determining the amount of oil to be produced from all oil pools for the following calendar month.

(This would merely change the monthly dates of hearings from the 15th to 20th, to the 13th to 20th, thus allowing for hearing to be held earlier in the month. This would facilitate the publication of the proration schedule, by making known the normal unit allowable at an earlier date. It would also allow more time between the New Mexico and Texas hearings for those who would attend both hearings.

505 (g)

The top unit allowables hereinabove determined shall be assigned to the respective pools in accordance with each pool's depth range. Allowables to marginal wells, other than those affected by gas-oil ratios, will be assigned on the basis of nominations submitted by the operator on form C-127. Such nominations must be based upon the ability of the well to produce without waste; otherwise the allowable will be assigned on the basis of the latest available production figures. The sum of the allocation to all marginal units plus the sum of the allocation to all non-marginal units in each pool shall constitute the allocation for each pool.

(No changes except to substitute form C-127 for form C-115 for use in making nominations.)

1114

Operator's monthly report, Form C-115, shall be filed on each producing lease within the State of New Mexico for each calendar month setting forth complete information and data indicated on said form. Oil production from wells which are producing into common storage shall be estimated as accurately as possible on the basis of periodic tests. Each report for each month shall be filed in time to reach the Commission offices not later than the 24th of the next succeeding month. Failure of the operator to file form C-115 in time to reach the Commission by the 24th of the month shall result in the reduction of the next month's allowable for the affected well or wells by one day for each day the C-115 is late.

It will not be necessary to fill in the daily well nomination column of form C-115, since this information is reported on form C-127.

(This proposed revision extends the deadline date for filing form C-115 from the 18th to the 24th of the month, and a penalty of an allowable reduction of one day for each day the report is late is provided. This proposal would also allow oil production of units producing into common storage to be estimated.)

1126

Request for allowable changes, Form C-127.

(One copy of Form C-127 shall be filed with the Oil Conservation Commission, Box 2045, Hobbs, New Mexico, not later than the 15th of the month preceding the month for which allowable changes are requested.)

This form shall include only the wells for which allowable changes are desired.

(El Paso Natural Gas Company's Proposed Rules)

GATHERING AND TRANSPORTING OF LIQUID HYDROCARBONS RECOVERED IN DRIPS OR OTHER COLLECTING DEVICES WHICH ARE A PART OF NATURAL GAS GATHERING AND TRANSMISSION LINES

- A. Before any liquid hydrocarbons may be recovered from drips or other collecting devices on natural gas gathering and transmission lines by a party other than the owner of the pipeline facilities from which it is to be recovered, the following regulations must be complied with:
 - 1. The party desiring to recover such liquid hydrocarbons must obtain from the New Mexico Oil Conservation Commission a permit to gather gas pipeline drip products. Such a permit shall be granted only after said party has proved to the Commission's satisfaction (1) that there is a need for such a permit and (2) that the operation will be conducted satisfactorily.
 - 2. Application for the permit discussed in 1 above must be accompanied by four copies of Form 110 executed by the owner of the gas pipeline facilities authorizing the gathering and transporting of such drip products and giving a description of the facilities which are authorized to be serviced.
 - 3. The gatherer and transporter authorized as provided above shall file Form 112 each calendar month in accordance with Rule 1111.
- B. Any liquid hydrocarbons which have been recovered from drips or other collecting devices on natural gas gathering and transmission lines by the owner of said pipeline facilities may be transported by a party other than such owner if the following regulations are complied with:
 - 1. The owner of the gas pipeline facilities shall execute in quadruplicate and file with the Commission Form C-110 authorizing the transportation and describing the facilities to be serviced.
 - 2. The owner of the gas pipeline facilities shall file with the Commission a monthly report on Form C-112 indicating therein stocks of liquid hydrocarbons on hand and deliveries to each transporter for the month.
 - 3. The authorized transporter shall file with the Commission a monthly report on Form C-112 indicating therein receipts from each storer and deliveries to storers or refiners for the month.

(Famariss Oil & Refining Company's Proposed Rules)

Rule 312, Subsection (c) of the Rules and Regulations of the Oil Conservation Commission be amended as follows:

None of the provisions of Paragraph (a) and (b) of this Rule are applicable to the recovery of wash-in oil, creek oil, pit oil, or scrubber oil where such oil is picked up and returned to the lease on which produced or where such oil is disposed of by the owner to an authorized purchaser or transporter and accounted for on Commission Form C-110. Provided, however, before any person other than the owner shall pick up, reclaim, salvage or transport wash-in oil, creek oil, pit oil, or scrubber oil, a permit to do so shall be obtained from the owner or operator of the lease, pipeline, or refinery and a permit from the duly authorized agent of the Commission. A purchaser or transporter desiring to obtain a permit to perform the services under Subsection (c) of this Rule shall:

- 1. File with the Commission a surety bond of performance satisfactory to the Commission, payable to the Commission of the State of New Mexico in the penal amount of \$25,000.00.
- 2. A written application for a permit to transport shall be filed and a public hearing had thereon. All applications to show:
 - (a) The name and location of the lease, trap or pit;
 - (b) The number of well or wells from which the oil or drip was produced or the source of such oil or drip;
 - (c) The name of the owner, operator or manager of the lease, pipeline or refinery;
 - (d) Contracts of purchase, if any.
- 3. All permitees will be required to establish permanent storage facilities in the area called for in the permit and give the location thereof, such facilities to serve the area covered by the permit.
- 4. All permitees will be required to furnish the following evidence, to-wit:
 - (a) Run Tickets showing acquistion;
 - (b) Accumulation reports showing storage;
 - (c) C-110;

After the granting of a permit in the event the permitee is found guilty of violation of any of the Rules and Regulations of the Oil Conservation Commission or any of the laws of the State of New Mexico in regard to the production, sale and transportation of oil or drip gasoline, said permit shall be subject to cancellation without hearing. The Commission may suspend any permitee upon presentation of evidence of violation of the Rules and Regulations of the Commission; provided, however, that such suspension shall be temporary until the charges against the permitee are made known to the permitee and the hearing before the Commission must be granted the permitee within twenty days after the notification of the charges made, and should the Commission determine that the charges are well founded, the Commission may then enter its order cancelling the permit.

RULE 312

SUBSECTION (c):

None of the provisions of Paragraph A and B of this rule are applicable to the recovery of wash-in oil, creek oil, pit oil, scrubber oil or drip gasoline or oil where such oil is picked up and returned to the lease on which produced or where such oil is disposed of by the owner to an authorized purchaser and accounted for on Commission Form C-110.

SUBSECTION (d):

The Commission shall issue a permit to any purchaser or transporter (not a common purchaser as defined by the rules of the Commission) upon such purchaser or transporter filing an application for a permit, such application to show the following, to-wit:

- 1. The name and location of the lease, trap or pit;
- 2. The source of such oil or drip;
- 3. The name of the owner or operator;
- 4. Copies of contracts of purchase;
- 5. The location of permanent storage to be installed by permitee;
- 6. Surety bond payable to the Oil Conservation Commission of the State of New Mexico in the penal amount of \$25,000.00 on a form satisfactory to the Commission.

Upon the granting of a permit to a purchaser or transporter, such permitee will be required to furnish the following evidence, to-wit:

- 1. Run tickets showing acquisition:
- 2. Accumulation reports showing storage
- 3. C-110
- 4. Monthly reports.

After the granting of a permit in the event the permitee is found guilty of violation of any of the Rules and Regulations of the Oil Conservation Commission or any of the laws of the State of New Mexico in regard to the production, sale and transportation of wash-in oil, creek oil, pit oil, scrubber oil, or drip gasoline, said permit shall be subject to cancellation without hearing. The Commission may suspend any permitee upon presentation of evidence of violation of the Rules and Regulations of the Commission; provided, however, that such suspension shall be temporary until the charges against the permitee are made known to the permitee and the hearing before the Commission must be granted the permitee within twenty days after the notification

of the charges made, and should the Commission determine that the charges are well founded, the Commission may then enter its order cancelling the permit.

SARRY and Am or ol Saturday Morning

Bill, in case you have not had time to look very closely at the proposals in case 779, here, briefly, are sum and substance.

The proposals by El Paso very closely follow the procedure under which we have been operating, with the exception that the prospective transporter would be required to obtain a permit after establishing the need for such a permit and furnishing proof that the operations would be conducted in a manner satisfactory to the Commission. They propose the filing of no other forms than the C 110 and C112.

The Famariss proposal would apply Rule 312c to the transportation and sale of drip, although this rule as amended ,or proposed does not specifically refer to drip . The requirements for the drip transporter to meet would be:

- 1, Furnish a \$25,000 surety bond.
- 2, Establish storage facilities.
- Obtain a permit from the Commission and
- File the following forms
 - C110, 22, Run tickets showing acquisition. accumulation reports showing storage, and monthly reports.

(Famariss Oil & Refining Company's Proposed Rules)

Rule 312, Subsection (c) of the Rules and Regulations of the Oil Conservation Commission be amended as follows:

None of the provisions of Paragraph (a) and (b) of this Rule are applicable to the recovery of wash-in oil, creek oil, pit oil, or scrubber oil where such oil is picked up and returned to the lease on which produced or where such oil is disposed of by the owner to an authorized purchaser or transporter and accounted for on Commission Form C-110. Provided, however, before any person other than the owner shall pick up, reclaim, salvage or transport wash-in oil, creek oil, pit oil, or scrubber oil, a permit to do so shall be obtained from the owner or operator of the lease, pipeline, or refinery and a permit from the duly authorized agent of the Commission. A purchaser or transporter desiring to obtain a permit to perform the services under Subsection (c) of this Rule shall:

- 1. File with the Commission a surety bond of performance satisfactory to the Commission, payable to the Commission of the State of New Mexico in the penal amount of \$25,000.00.
- 2. A written application for a permit to transport shall be filed and a public hearing had thereon. All applications to show:
 - (a) The name and location of the lease, trap or pit;
 - (b) The number of well or wells from which the oil or drip was produced or the source of such oil or drip;
 - (c) The name of the owner, operator or manager of the lease, pipeline or refinery;
 - (d) Contracts of purchase, if any.
- 3. All permitees will be required to establish permanent storage facilities in the area called for in the permit and give the location thereof, such facilities to serve the area covered by the permit.
- 4. All permitees will be required to furnish the following evidence, to-wit:
 - (a) Run Tickets showing acquistion;
 - (b) Accumulation reports showing storage;
 - (c) C-110;

After the granting of a permit in the event the permitee is found guilty of violation of any of the Rules and Regulations of the Oil Conservation Commission or any of the laws of the State of New Mexico in regard to the production, sale and transportation of oil or drip gasoline, said permit shall be subject to cancellation without hearing. The Commission may suspend any permitee upon presentation of evidence of violation of the Rules and Regulations of the Commission; provided, however, that such suspension shall be temporary until the charges against the permitee are made known to the permitee and the hearing before the Commission must be granted the permitee within twenty days after the notification of the charges made, and should the Commission determine that the charges are well founded, the Commission may then enter its order cancelling the permit.

(El Paso Natural Gas Company's Proposed Rules)

GATHERING AND TRANSPORTING OF LIQUID HYDROCARBONS RECOVERED IN DRIPS OR OTHER COLLECTING DEVICES WHICH ARE A PART OF NATURAL GAS GATHERING AND TRANSMISSION LINES

- A. Before any liquid hydrocarbons may be recovered from drips or other collecting devices on natural gas gathering and transmission lines by a party other than the owner of the pipeline facilities from which it is to be recovered, the following regulations must be complied with:
 - 1. The party desiring to recover such liquid hydrocarbons must obtain from the New Mexico Oil Conservation Commission a permit to gather gas pipeline drip products. Such a permit shall be granted only after said party has proved to the Commission's satisfaction (1) that there is a need for such a permit and (2) that the operation will be conducted satisfactorily.
 - 2. Application for the permit discussed in l above must be accompanied by four copies of Form 110 executed by the owner of the gas pipeline facilities authorizing the gathering and transporting of such drip products and giving a description of the facilities which are authorized to be serviced.
 - 3. The gatherer and transporter authorized as provided above shall file Form 112 each calendar month in accordance with Rule 1111.
- B. Any liquid hydrocarbons which have been recovered from drips or other collecting devices on natural gas gathering and transmission lines by the owner of said pipeline facilities may be transported by a party other than such owner if the following regulations are complied with:
 - 1. The owner of the gas pipeline facilities shall execute in quadruplicate and file with the Commission Form C-110 authorizing the transportation and describing the facilities to be serviced.
 - 2. The owner of the gas pipeline facilities shall file with the Commission a monthly report on Form C-112 indicating therein stocks of liquid hydrocarbons on hand and deliveries to each transporter for the month.
 - 3. The authorized transporter shall file with the Commission a monthly report on Form C-112 indicating therein receipts from each storer and deliveries to storers or refiners for the month.
