Case # 1059

AMENDED APPLICATION TO DUALY COMPLETE

The Texas Company's A. H. Blinebry
(NCT-1) Well No. 7, Blinebry Oil
Pool & Tubb Gas Pool, Lea County,
New Mexico

*Amended copy
4/10/56*

New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Gentlemen:

By this letter of amended application, The Texas Company wishes to state the following:

- (a) That The Texas Company's A. H. Blinebry (NCT-1) Well No. 7, located in the G, SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 19-22S-38E, has been completed at a plugged back total depth of 6252 feet. The attached Exhibit "A" shows the location of the subject well on the A. H. Blinebry (NCT-1) Lease with the location of all offset wells. The attached Exhibits "B" and "C" show a diagrammatic sketch of the proposed dual completion.
- (b) That the subject well has seven-inch casing set at 6250 feet and cemented with 500 sacks of cement which extends behind the pipe to 2960 feet. The well is to be an oil-gas dual well having open the interval 6120 to 6200 feet from the Tubb formation in the Tubb Gas Pool, and the interval 5558 to 5688 feet from the Blinebry formation in the Blinebry Oil Pool.
- (c) That the applicant proposes to dualy complete the well in the following manner:
 - 1. Set production type packers below the upper perforations at approximately 6090 feet and at approximately 10 feet above the upper perforations to separate the two pay zones. (See Exhibits "B" and "C")

2. Produce the Tubb Gas Pool gas through the tubing-casing annulus and the Blinebry Oil Pool oil through the tubing.
- (d) That the granting of this application for permission to produce the well as a dual completion with oil from the Blinebry Oil Pool and gas from the Tubb Gas Pool is in the interest of conservation and the protection of correlative rights.
- (e) That the applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.
- (f) That the manner and method of the proposed dual completion is mechanically feasible and practical.
- (g) That by copy of this letter of application, all offset operators are notified by registered mail of the proposed dual completion.

Therefore, The Texas Company respectfully requests that the Oil Conservation Commission set for hearing this application to dually complete the subject well as proposed. The Texas Company further requests that said hearing be set on the first available docket, either before an examiner or before the Commission at its regular monthly hearings.

Respectfully submitted,

THE TEXAS COMPANY
