Dear Sir:

On behalf of your clients, Tom Boyd and Jack Plemons, we enclose two copies of Order R-884 issued September 27, 1956, by the Oil Conservation Commission in Case 1141, which was heard on September 6th at Hobbs.

The above order indicates that the application of Tom Boyd and Jack Plemons to produce wells from two different pools into the same tank battery was denied due to the fact that the applicant failed to prove there was an economic necessity for the commingling. The applicants' Continental State 27 Well No. 4 was completed as a top allowable well in the Grayburg Keeley Pool, as have all other wells been completed in this pool. It is the feeling of this Commission that unless economic conditions make commingling necessary that each pool should be measured separately.

Yours very truly,

A. L. Porter, Jr.
