IN THE MATTER OF THE APPLICATION
OF CONTINENTAL OIL COMPANY FOR
AUTHORITY TO EFFECT A GAS-GAS
DUAL COMPLETION IN THE TUBB AND
BLINEBRY FORMATIONS IN ITS WARREN
UNIT WELL NO. 8 LOCATED 1980 FEET
FROM SOUTH AND EAST LINES OF
SECTION 28-T20S-R38E, SMPM, LEA
COUNTY, NEW MEXICO, AND FOR
PERMISSION TO STORE LIQUIDS
PRODUCED FROM THE TWO ZONES IN
COMMON TANKAGE.

A P P L I C A T I O N

Comes now applicant, Continental Oil Company, and respectfully petitions the Commission for authority to effect a gas-gas dual completion in the Tubb and Blinebry formations in its Warren Unit well No. 8 and to commingle the liquids produced therefrom, and in support thereof would show:

1. That applicant is operator of the Warren Unit which contains, in addition to other lands, Section 28-T20S-R38E, Lea County, New Mexico.
2. That applicant drilled and completed on March 12, 1950, its Warren Unit Brinkard well No. 8 as an oil well in the Brinkard formation at a location 1980 feet from south and east lines of said Section 28.
3. That production from said well declined to such a rate that it was plugged back and tested in the Tubb and Blinebry formations.
4. That tests in the Tubb and Blinebry formations indicate that both formations will produce gas in commercial quantities.

5. That the proposed dual completion will be accomplished by utilizing parallel tubing strings and such packers and other equipment as are necessary and adequate to maintain separation of the fluids produced from each of the two producing formations.

6. That the dual completion of the said well as proposed is mechanically and economically feasible and is in the interest of conservation of gas.
7. That surface equipment will provide means of taking accurate tests of the individual formations and measurement of the production therefrom as required by the Commission.

Wherefore, applicant respectfully prays that this application be set for hearing before the commission's duly appointed examiner at Hobbs, New Mexico, that due notice thereof be given and that upon hearing an order be entered granting applicant authority to effect the dual completion described above, and to commingle the liquids therefrom in common storage tanks.

Respectfully submitted
CONTINENTAL OIL COMPANY

Attention: Mr. A. L. Porter, Jr.

2xc to Sub 303

Gentlemen:

We forward herewith application for gas-gas dual completion in Tubb and Blinberry formations for our Warren Unit well No. 8. It is our understanding that a hearing is necessary for approval of this dual completion, since the well is not within the defined limits of a gas pool.

Sent copy

We should appreciate your placing this application for hearing at the same time as the three applications for non-standard units forwarded to you by letter dated August 28, 1956.
