Attention: Mr. A. L. Porter, Jr.

Gentlemen:

Reference is made to a letter dated October 29, 1957 addressed to the Commission from The Texas Company in which The Texas Company requests that the cumulative underproduction assigned State of New Mexico "B" MCT-2 Well No. 3 be continued, at least through the first half of 1958, in order that The Texas Company may have an opportunity to produce its fair share of the reserves underlying the acreage attributable to said well.

Permian Basin Pipeline Company is the purchaser of the gas produced from the subject well. Permian informs the Commission that if the subject well is capable of producing in excess of its assigned allowable after the compression facilities referred to in The Texas Company letter are installed, Permian will endeavor to accept deliveries from the subject well in excess of the assigned allowable after January 1, 1958 so that the cumulative underproduction will be produced. Permian believes that the Commission should in the proper exercise of its discretion grant the request of The Texas Company contained in its said letter of October 29, 1957 in order to allow The Texas Company an opportunity to produce the gas allowable assigned to the subject well. Therefore, Permian urges the Commission to grant the relief requested by The Texas Company in its letter of October 29, 1957.

Yours very truly,

  
Rex D. Fowler  
Manager, Gas Purchased Operations
