DIRECT EXAMINATION

A A. R. Hendricks, engineer with the Oil Conservation Commission.

A I have.

MR. COOLEY: Does the Commission accept the qualifications of this witness?

MR. PORTER: His qualifications are acceptable.

Q Mr. Hendricks, have you made a study for the creation of a new gas pool for Gallup production in Township 26 North, Range

A I have.

Q What are your recommendations?

A I recommend this pool be created as advertised based on the Weaver-Brown No. 1 McAdams Well, which was completed in the Gallup formation for initial potential of 9010 cubic feet.

Q What do you recommend as the vertical limits of the proposed Angel's Peak Gallup Gas Pool, Mr. Hendricks?

A The Gallup formation.

Q Have you likewise made a study for the creation of a new oil pool for Gallup production in Township 24 North, Range 7 West?

A I have.

Q What are your recommendations in that regard?

A I recommend that the acreage as advertised be created into this pool plus an unadvertised portion, that being the N/2 of Section 34, Township 24 North, Range 7 West, and this pool would be created based on seven wells completed capable of producing. The discovery well was the Standard of Texas' No. 1 Federal 1-27, in Unit O, Section 27, 24 North, 7 West, with an initial potential of 70 barrels per day. Top of perforation is 5700 feet.

Q What are your recommendations concerning the extension of the Verde-Lower Gallup Oil Pool?

A I recommend the Verde-Lower Gallup Oil Pool be extended as advertised based on two wells capable of producing.

Q Mr. Hendricks, do you have any further recommendations in this case?

A No.

Q Have you prepared an exhibit to substantiate your recommendations in this case?

A I have an exhibit prepared by me, and three copies of Form C-123 submitted by operators requesting the creation of

the two pools created and recommending a portion of the extension of the Bisti-Lower Gallup Oil Pool.

Q Mr. Hendricks, have you identified those exhibits?

A They would be identified as Exhibits 1, 2, 3, and 4.
