

OIL CONSERVATION COMMISSION  
SANTA FE, NEW MEXICO

Date 6-5-58

CASE NO. 1425

HEARING DATE DSN SF 9am 5-6-58

My recommendations for an order in the above numbered case(s) are as follows:

Enter an order approving the 160-acre non-std gas proration unit in the Tubbs gas pool as requested by applicant.

While there is considerable doubt in my mind as to whether applicant has provided substantial evidence that the acreage within the unit is entirely productive of gas, particularly the North half of it, the consensus of Commission staff experts is that it is. ∴ yield
