CASE 1427

Hearing Date 9:A.M May 6 - DSN at SF

My recommendations for an order in the above numbered cases are as follows:

I recommend the establishment of the non-standard gas proration unit requested by applicant in the subject case. All interests have been communitized. The only necessity for a hearing to establish this unit is the non-standard location of the well for a 480-acre unit. No objections to the granting of the application were received and the acreage may reasonably be presumed to be productive of gas in the Eumont Gas Pool.
