Chief Engineer

Re: Application For The British-American Oil Producing Company  
Proposed Slim Hole Completion, Fullerton #6,  
San Juan County, New Mexico

Gentlemen:

The British-American Oil Producing Company herein requests that we be included on the Docket For Hearing July 27, 1960 for authority to "slim hole" complete a Dakota gas well.

*should be Fullerton #7*

We propose to drill the Fullerton #6 at a location 1850' NSL and 1850' BWL of Section 11-27N-11W, San Juan County, New Mexico. We propose to drill a 7-7/8" hole to the approximate top of the Dakota gas sand and then a 6-1/4" hole to a T.D. of approximately 6350'. The estimated Dakota gas sand interval will be from 6286-6316' depth. It is possible that we will drill the 7-7/8" hole to T.D. A string of 2-7/8" O.D. tubing will be set through the Dakota pay and cement will be circulated to a depth above the Gallup sand. A cementing stage collar will be utilized to cement the Pictured Cliffs zone. For your information, British-American, et al owns all of Section 11.

Very truly yours,

THE BRITISH-AMERICAN OIL PRODUCING COMPANY
