Commissioner of Public Lands State Land Office Santa Fe, New Mexico

RE: Proposed Comingling of Oil Saunders Field Lea County, New Mexico

Dear Sir:

Amerada Petroleum Corporation is desirous of comingling oil between certain State Oil and Gas Meases in the Saunders Field. The three leases involved are State Nos. B-10845, E-2116 and E-2118.

A plat is attached showing the present flow lines by solid lines, and the proposed flow lines by broken lines. We propose to run oil from well #4 "SD" to the tank battery at #1 "SI", and from #4 "SB" to the battery on the "SD" lease.

All of the lands involved, both the producing tracts and the receiving tracts, have the royalty credited to the Common School Fund, so that there will be no conflict of royalty interest. From the royalty owner's standpoint, we feel that by reducing the length of the flow lines from the two wells to the tanks, the wellhead back pressure will be reduced, thus increasing the ability of the wells to produce.

Before making application to the Conservation Cormission for an exception to Rule 309 we must obtain approval from the State Land Office for comingling the oil as requested above. If you approve this request, please so signify by signing the attached copy of this letter and return to us at Box 591, Hidland, Texas.

Yours very truly,

AMERADA PETROLEUM CORPORATION

John Cornwall
