Q What formations are in this area that might be productive?

A As far as I know, there are no formations between this area and the surface casing that would be productive in this particular area.

Q Do you know of any prolific water zones?

A No, sir, we feel we have protected all fresh water zones with surface and intermediate casing.

Q You don't feel, then, that possibility of corrosion from the outside into the tubing would be any worse here than anywhere else?

A No, sir, we have no reason to expect that in this particular installation than in the others.

Q Is this a single completion?

A Yes.

MR. UTZ: Are there any other questions of the witness?  
The witness may be excused.

(Witness excused.)

Are there any other statements in Case 2510?

The case will be taken under advisement.
