Q Mr. Nutter, are you prepared today to recommend to the Commission for an order creating new pools and extending and abolishing existing pools in Lea and Roosevelt Counties, New Mexico?

A Yes, sir.

Q And in that regard have you prepared an exhibit designated Exhibit 1 in this case?

A I have had such an exhibit prepared, yes.

Q Referring to that exhibit, paragraph (a), what is your recommendation concerning the creation of the new oil pool for Pennsylvanian production?

A I would recommend that the West Allison-Pennsylvanian Pool be created, comprising the Northwest Quarter of Section 31, Township 8 South, Range 36 East, Roosevelt County. The discovery well was the Olen F. Featherstone-Stone Federal No. 1 in Unit C of Section 31. It was completed in the Bough "C" formation of the Pennsylvanian January 9th, 1962. The top of the perforations is 9793 feet.

Q Referring to paragraph (b) of Exhibit 1, what is your recommendation concerning the creation of the new oil pool for Drinkard production?

A I would recommend that the Goodwin-Drinkard Pool be created, comprising the Northwest Quarter of Section 30, Township 18 South, Range 37 East, Lea County. The discovery well was the Continental Oil Company - Goodwin 30 No. 1 in Unit E of Section

30. It was completed in the Drinkard formation February 25, 1962, with the top of the perforations at 7347.

Q What is your recommendation concerning the creation of a new oil pool for Devonian production?

A I would recommend the Monument Draw-Devonian be created, comprising the Southeast Quarter of Section 17, Township 23 South, Range 38 East, Lea County. The Pool was discovered by Williamson Petroleum Company - Wahlenmaier Federal No. 1 in Unit P of Section 17. It was completed February 19, 1962, and the top of the perforations is 8226 feet.

Q Do you have a recommendation concerning the East Prairie-Pennsylvanian Pool?

A Yes, sir, I would recommend that the East Prairie-Pennsylvanian Pool in Section 23, Township 8 South, 36 East, Roosevelt County, be abolished. The reason for this is that it produces from the same reservoir as the South Prairie-Pennsylvanian Pool.

Q With respect to paragraphs (e) through (m) of Exhibit No. 1, do those paragraphs accurately reflect the proposed extensions of various pools in Lea and Roosevelt Counties, New Mexico?

A Yes, sir, they do, and they are identical to the extensions advertised or described on the docket, with three exceptions. In paragraph (f), the Allison-Pennsylvanian Pool I have recommended to be extended as on the docket, plus the West Half

of the Southeast Quarter of Section 33 of Township 8 South, 37 East.

In paragraph (g) I would recommend the North Justis-Devonian Pool be extended as shown on the docket, with the addition also of the Southwest Quarter of Section 35, Township 24 South, Range 37 East; and in paragraph (m), I would recommend that the Vacuum-Abo Pool be extended as shown on the docket, also add the Northeast Quarter of Section 8, Township 18 South, Range 35 East.

All of this is shown on the exhibits, and is the same as the dockets, except those noted exceptions.

Q Do you have anything further you would like to add in this case?

A I would like to offer the exhibit.

MR. MORRIS: If the Commission please, we will offer Exhibit 1, Case 2585, and that concludes the direct examination of Mr. Nutter.

MR. PORTER: The exhibit will be admitted in the record.

(Whereupon, Commission Exhibit No. 1 admitted in evidence.)

MR. PORTER: Any questions of the witness? The witness may be excused.

(Witness excused.)

MR. PORTER: We'll take the case under advisement.
